CALL TO ORDER	3
CIRM UPDATE – ALAN TROUNSON	3
PRESENTATION ON HOPE AND CAUTIONS FOR CLINICAL TRIALS:	
ARNOLD KRIEGSTEIN	19
PUBLIC COMMENT	32

## BARRISTERS' REPORTING SERVICE

1 SAN FRANCISCO, CALIFORNIA; WEDNESDAY, MARCH 11, 2009

2  
3 MR. SHEEHY: SO I WANT TO THANK EVERYBODY  
4 FOR COMING. MY NAME IS JEFF SHEEHY. I'M A MEMBER  
5 OF THE GOVERNING BOARD OF THE CALIFORNIA INSTITUTE  
6 FOR REGENERATIVE MEDICINE. AND I'M NOT GOING TO  
7 WASTE A LOT OF TIME WITH INTRODUCTIONS. SO, ALAN,  
8 OUR PRESIDENT, ALAN TROUNSON, IS GOING TO START US  
9 OFF TODAY AND, AGAIN, ENGAGE, DISCUSS. ANY INPUT WE  
10 GET FROM YOU TODAY IS INCREDIBLY VALUABLE AS WE TRY  
11 TO FIGURE OUT WHERE WE'RE GOING INTO THE FUTURE WITH  
12 OUR STRATEGIC PLAN.

13 DR. TROUNSON: THANKS, JEFF. AND AS JEFF  
14 SAID, IT'S REALLY THE INPUT THAT WE'RE LOOKING FOR  
15 YOU. SO WHAT I'M GOING TO DO IS GIVE YOU A CONTEXT,  
16 AND THEN WE'RE REALLY GOING TO HAVE A REAL  
17 SCIENTIST -- I WISH I WAS A REAL SCIENTIST.  
18 MAGNIFICENT TIME, I THINK, TO BE A SCIENTIST -- GIVE  
19 US A TALK ABOUT HOW IT REALLY GOES FROM THE BENCH TO  
20 THE BEDSIDE, WHICH IS REALLY WHAT WE'RE ABOUT.

21 SO THE MISSION STATEMENT WHICH IS WHAT WE  
22 REALLY LOOK TO ALL THE TIME IN TRYING TO DEFINE HOW  
23 WE SET OUR PARAMETERS TO IS STATED HERE. AND REALLY  
24 WHAT IT'S SAYING, I THINK, AS I INTERPRET IT, IS  
25 THAT THE CALIFORNIA SEVEN MILLION PEOPLE WHO VOTED

## BARRISTERS' REPORTING SERVICE

1 IN FAVOR OF PROPOSITION 71 WANT TO SEE SOME OF THE  
2 DISCOVERIES TURNING INTO TREATMENTS IN THE CLINIC.  
3 IF THAT HAPPENS AT THE COMPLETION OF THE EXPENDITURE  
4 OF \$3 BILLION, I THINK IT'S LIKELY TO BE CONSIDERED  
5 A WORTHWHILE EXPERIMENT. IF WE'VE GOT NOTHING  
6 REALLY IN THE CLINIC AT THAT TIME, I THINK THERE  
7 WOULD BE SOME CONCERNS BECAUSE THE GENERAL  
8 POPULATION IN CALIFORNIA WON'T UNDERSTAND THE VALUE  
9 OF *SCIENCE*, *CELL*, AND *NATURE* PAPERS AS US SCIENTISTS  
10 DO AS BEING THE PANACEA FOR WHAT WE DO, BUT  
11 ESSENTIALLY WHETHER THERE ARE ACTUALLY TREATMENTS  
12 PROGRESSING THROUGH THE CLINIC.

13 SO THERE ARE GOALS WHICH ARE FIVE- AND  
14 TEN-YEAR GOALS THAT WERE SET. I'VE JUST LISTED THEM  
15 HERE, AND THEY'RE IN THE HANDOUT. SO IT'S JUST TO  
16 REMIND EVERYBODY THAT THERE WERE TEN GOALS SET UP IN  
17 EACH OF THE FIVE-AND TEN-YEAR FRAMEWORKS. AND WE'VE  
18 BEEN SORT OF WORKING OUR WAY AS QUICKLY AS POSSIBLE  
19 TO COMPLETE THOSE.

20 THERE ARE SOME WHICH WE'VE BACKED OFF ON,  
21 AND GOAL NO. 5 THERE, ESTABLISHING A STEM CELL BANK,  
22 WE HADN'T ACTUALLY MADE ANY PROGRESS THERE. AND I  
23 THINK THAT WAS THE RIGHT THING IN RETROSPECT NOW,  
24 THAT THERE ARE STEM CELL BANKS ESTABLISHED HERE IN  
25 THE U.S. AND THROUGHOUT THE WORLD WHERE YOU CAN

## BARRISTERS' REPORTING SERVICE

1 ACCESS CELLS FROM A VERY MAJOR VARIETY OF DIFFERENT  
2 CELL TYPES, EMBRYONIC STEM CELLS AND ADULT STEM  
3 CELLS. BUT THE THINGS ARE CHANGING SO QUICKLY, THAT  
4 I THINK THAT THE BANKS IN THE END THAT WILL BE  
5 INCREDIBLY VALUABLE WILL BE THOSE ONES WHICH ARE  
6 ACCEPTED BY THE REGULATORY AUTHORITIES FOR CLINICAL  
7 APPLICATION.

8 SO IT MAY BE WHEN WE DO DO THE BANKING,  
9 IT'S GOING TO BE AT A DIFFERENT TIME THAN I THINK  
10 WAS FIRST ENVISAGED IN THE PLAN. MANY OF THE OTHER  
11 GOALS, AS YOU SEE IN ITALICS, WE'VE ADDRESSED OR  
12 ADDRESSING. AND ESSENTIALLY WE'RE ON THE MOVE TO DO  
13 THOSE THINGS. SO THESE GOALS HAVE REALLY NOT  
14 ALTERED PARTICULARLY. WHAT HAS CHANGED, OF COURSE,  
15 IS THE FRAMEWORK OVER WHICH WE'RE WORKING. AND THE  
16 TEN-YEAR GOALS HAVE BEEN WRITTEN IN A WAY WHERE YOU  
17 COULD PROBABLY MAKE THEM WITH ADJUSTMENTS, BUT WE  
18 DIDN'T HAVE IPS CELLS WHEN ALL OF THIS WAS WRITTEN  
19 CLEARLY. WE DIDN'T KNOW THAT WE WOULD BE  
20 PROGRESSING SO QUICKLY IN SOME OTHER AREAS.

21 AND SO THIS REVISION IS TO SORT OF  
22 REFORMAT THE STRATEGIC PLAN A LITTLE BECAUSE WE WERE  
23 REQUIRED TO RELOOK AT IT IN A FIVE-YEAR TIMEFRAME.  
24 AND WE'RE ABOUT TWO AND A HALF YEARS IN NOW. AND  
25 BECAUSE THINGS HAVE CHANGED SO QUICKLY AND BECAUSE

## BARRISTERS' REPORTING SERVICE

1 WE'VE MADE ADJUSTMENTS, WE THOUGHT IT WAS WORTHWHILE  
2 TRYING TO GET SOME INPUT FROM THE COMMUNITY AND FROM  
3 BUSINESS ABOUT WHAT SHOULD BE OUR PRIORITIES AND HOW  
4 SHOULD WE MAKE ADJUSTMENTS TO OUR CURRENT PLAN.

5 SO THOSE GOALS ARE THERE. PLEASE LOOK AT  
6 THEM. OFTEN PEOPLE DON'T READ THEM, BUT WE DO PAY  
7 ATTENTION TO THEM. THERE ARE SOME GOALS WHICH  
8 PROBABLY WILL TAKE SOME TIME TO ADJUST TO; FOR  
9 EXAMPLE, HOW WE GET INVOLVED WITH GMP FACILITIES.  
10 DO WE REALLY WANT TO BE OPERATING A FACILITY? DO WE  
11 WANT TO BE SUPPORTING THE OPERATION OF FACILITIES?  
12 SOME OF THOSE THINGS, I THINK, ARE STILL TO BE  
13 DETERMINED. WE'VE HAD WORKSHOPS ON THAT. AND MARIE  
14 CAN ADDRESS THOSE QUESTIONS IF YOU HAVE IN THAT  
15 AREA.

16 SO WE DO SEE IT AS A PIPELINE AND A VALUED  
17 PIPELINE AT THAT. SO WE UNDERSTAND THAT THE BASIC  
18 AND DISCOVERY RESEARCH WILL USUALLY ALL BE DONE IN  
19 THE UNIVERSITIES, RESEARCH INSTITUTES, AND  
20 HOSPITALS. IT DOES HAPPEN IN COMPANIES AND  
21 PARTICULARLY IN DRUG COMPANIES. SOME VERY SPECIAL  
22 DEVELOPMENTS DO OCCUR, BUT GENERALLY THE BASIC  
23 CHANGES IN DISCOVERY ARE HAPPENING DOWN THAT END IN  
24 THE NOT-FOR-PROFIT INSTITUTIONS. THEN THERE'S AN  
25 AREA WHERE IT REQUIRES VENTURE TO COME IN NORMALLY

## BARRISTERS' REPORTING SERVICE

1 TO SUPPORT THE TRANSLATIONAL WORK WHERE THE BIOTECH  
2 COMPANIES, THE BIOTECHNOLOGY COMPANIES, ARE VERY  
3 SOUND IN THE WAY THEY DO THOSE THINGS. THEY'VE HAD  
4 EXPERIENCE. THEY KNOW WHAT'S REQUIRED FOR MEETING  
5 THE RISK AND EFFICACY REQUIREMENTS BY THE REGULATORY  
6 AGENCIES AND THEN AT THE OTHER END WHERE THE BIG BIO  
7 OR THE PHARMACEUTICAL COMPANIES WILL BE MOST ACTIVE.

8 NOW, EACH ONE OF THESE DEVELOPMENTS WILL  
9 BE ITSELF DIFFERENT, BUT WE UNDERSTAND IN PRINCIPLE  
10 THAT IT WORKS LIKE THIS. THE COSTS CHANGE ALSO  
11 QUITE DRAMATICALLY FROM ONE END WHERE DEVELOPMENT OF  
12 A DISCOVERY MAYBE COSTS A MILLION OR \$5 MILLION, BUT  
13 THE BY THE TIME YOU GET IT THROUGH TO THE CLINICAL  
14 END AND OUT TO THE COMMUNITY, IT CAN COST UP TO A  
15 BILLION DOLLARS IN THE PHARMACEUTICAL MODEL OR EVEN  
16 MULTIPLE BILLION DOLLARS TO GET ALL THOSE DRUGS  
17 THROUGH EACH ONE OF THEM.

18 SO IT'S GOING TO COST A LOT OF MONEY AT  
19 SOME POINT IN TIME AS WE TAKE THERAPIES AND DRUGS  
20 WHICH ARE EMANATING FROM THERAPIES THROUGH. SO  
21 WE'RE GOING TO HAVE TO LOOK AT SOME WAYS OF HELPING  
22 TO HELP THE SYSTEM WORK IN THIS. THE PHARMACEUTICAL  
23 COMPANIES COME IN AND TAKE A PIECE, WHETHER THEY  
24 WILL REALLY TAKE ENOUGH OF THE WHOLE TO ACCOMMODATE  
25 ALL OF THE NEEDS OF THE COMMUNITY WE'RE VERY

## BARRISTERS' REPORTING SERVICE

1 DOUBTFUL ABOUT. SO WE THINK THAT THERE MIGHT NEED  
2 TO BE A CHANGE IN THE CONSIDERATION OF HOW TO FUND  
3 CLINICAL TRIALS. AND IT MAY BE THAT WE HAVE TO TALK  
4 GOVERNMENT INTO BEING INVOLVED IN THAT END BECAUSE  
5 THEY WOULD BE THE BENEFICIARIES IF CURES HAPPEN AND  
6 ALSO TALKING THE HEALTH INSURANCE COMPANIES TO BE  
7 INVOLVED.

8 SO THIS IS ONE OF THE AREAS WHERE WE THINK  
9 THERE'S A POTENTIAL ROADBLOCK WHICH WE NEED TO  
10 ADDRESS, AND IT'S ONE OF THE AREAS THAT WE THINK WE  
11 OUGHT TO BECOME ACTIVE IN, HOW TO FIGURE OUT HOW TO  
12 FUND THOSE CLINICAL TRIALS BECAUSE WE WOULDN'T  
13 REALLY HAVE THE MONEY TO RUN ALL OF THOSE, CERTAINLY  
14 NOT RUN MANY OF THEM.

15 MOVING THE PIPELINE FORWARD IS SHOWING YOU  
16 HERE IN THE GREEN IS THE BASIC AREAS, AND THAT'S  
17 WHAT WE'VE BEEN FUNDING UP UNTIL NOW. THE GREEN  
18 COMPONENTS ARE THERE, THE SEED, COMPREHENSIVE, NEW  
19 FACULTY AWARDS, ETC., THE BIOLOGY OF STEM CELLS,  
20 THESE ARE ALL AT THE BASIC END OF THE FRAMEWORK.  
21 WE'RE NOW ONLY JUST MOVING INTO TRANSLATION. WE  
22 HAVE AN EARLY TRANSLATIONAL RFA WHICH HAS BEEN UNDER  
23 REVIEW, HAS BEEN THROUGH REVIEW. THE DISEASE TEAM  
24 PROGRAM WHERE WE'RE SEEKING TEAMS TO INPUT TO TAKE  
25 DISCOVERIES THROUGH TO AN IND WITHIN FOUR YEARS,

## BARRISTERS' REPORTING SERVICE

1     QUITE DEMANDING, BUT WE UNDERSTAND THERE ARE A LOT  
2     OF TEAMS OUT THERE THAT BELIEVE THAT THEY'RE IN THIS  
3     FRAMEWORK, UP TO A HUNDRED OR MAYBE EVEN MORE.

4             AND THAT WAS SURPRISING TO US THAT THERE  
5     ARE THAT MANY; AND IF THERE ARE, THERE'S SOME REASON  
6     WHY THEY'RE NOT SORT OF PROGRESSING MORE QUICKLY.

7             WE THINK THAT IF YOU'RE GOING TO USE STEM  
8     CELLS, YOU HAVE TO ADDRESS THE IMMUNOLOGY BECAUSE IF  
9     THEY'RE ALLOGENEIC TO THE PATIENT, IF THEY'RE  
10    DIFFERENT TO THE PATIENT, THEN WE ARE GOING TO HAVE  
11    TO ADDRESS THE ISSUE OF REJECTION. AND SO TOLERANCE  
12    OR TOLERANCE TO TRANSPLANTATION IS GOING TO BE A  
13    KEY, AND WE WANT TO DO SOMETHING ABOUT THAT. SO  
14    THAT FITS IN PRETTY MUCH BETWEEN THE BASIC AND THE  
15    CLINICAL COMPONENT, DEVELOP METHODOLOGIES THAT ALLOW  
16    WHEN WE TRANSPLANT CELLS, THAT THEY'LL REMAIN --  
17    THEY'LL CONTINUE TO DO THE JOB WHICH THEY'RE  
18    INTENDED TO DO.

19            THE AWARDS FUNDED TO DATE BY THE ICOC,  
20    THERE'S BEEN OVER \$630 MILLION ALLOCATED AND SHOWN  
21    IN THAT PIE CHART WHERE IT'S GONE IN TERMS OF  
22    TRAINING, RESEARCH GRANTS, SHARED LABORATORIES, AND  
23    FACILITIES. SO IT'S A BIG CHUNK OF MONEY THAT WE'VE  
24    INVESTED IN CALIFORNIA.

25            AND IF YOU LOOK AT WHAT THE EXTENT OF

## BARRISTERS' REPORTING SERVICE

1 FUNDS THAT HAVE BEEN ACTUALLY AGREED TO BY THE ICOC,  
2 WHICH INCLUDES AROUND 200 MILLION FOR THE DISEASE  
3 TEAMS, WE'RE GETTING UP TO AROUND ONE BILLION OR  
4 ABOUT A THIRD OF THE ENTIRE \$3 BILLION PROGRAM. SO  
5 IT IS AN IMPORTANT STAGE, I THINK, TO SORT OF CHECK  
6 WITH THE COMMUNITY THAT WE'RE PROGRESSING IN THE  
7 RIGHT DIRECTION AND WE'RE SEEING THE PRIORITIES  
8 REFLECTED FROM WHAT YOU THINK THEY ARE.

9 THE DISTRIBUTION ACCORDING TO THE  
10 DIFFERENT PROGRAMS, ESSENTIALLY MOST OF THE BASIC  
11 RESEARCH REQUIRES LESS MONEY FOR EACH OF THE  
12 PROJECTS THAN DOES THE TRANSLATION. WE ASKED THE  
13 ICOC FOR \$60 MILLION FOR THAT PROGRAM, AND WE ASKED  
14 FOR \$210 MILLION FOR THE DISEASE TEAMS. YOU CAN SEE  
15 BY THIS PIE CHART THAT THAT'S A MUCH MORE EXPENSIVE  
16 COMPONENT THAN THE BASIC SCIENCE AREAS. SO IT'S  
17 REFLECTED IN THE NEEDS, THE NEEDS FOR ANIMAL MODELS  
18 DOING VOLUMES OF WORK GETTING MANUFACTURING INTO  
19 PLACE AND SO ON. THESE KIND OF THINGS TEND TO BE  
20 MORE EXPENSIVE UNFORTUNATELY THAN WOULD BE THE BASIC  
21 RESEARCH. SO THE SHIFT, IF YOU LIKE, FOR US MOVING  
22 INTO THIS TRANSLATION EARLY CLINICAL PHASES IS THAT  
23 THERE WILL BE MORE MONEY EXPENDED IN THOSE PROGRAMS  
24 THAN THERE IS IN THE BASIC PROGRAMS.

25 THE AVERAGE AWARDS, JUST TO SHOW YOU, ARE

## BARRISTERS' REPORTING SERVICE

1 IN THE UPPER REACHES OF NIH GRANTS. SO WE TEND TO  
2 FUND ON THE UPPER SIDE OF VALUE REALLY BECAUSE WE  
3 WANT THE PROJECTS DONE. WE DON'T WANT TO CUT  
4 ANYTHING BACK. WE'VE ALWAYS RESISTED ANY PRUNING OF  
5 THE BUDGETS. WE TAKE THE BUDGETS THAT ARE SUBMITTED  
6 EXCEPT WHERE IT DOES SEEM STRANGE WHERE WE GO BACK  
7 TO THE APPLICANT AND CHECK ON IT, BUT WE'VE NOT GONE  
8 ON 10-PERCENT PRUNING OR 20-PERCENT PRUNING TO  
9 IMPROVE THE PROGRAM. WE'VE SAID, OKAY, THAT'S THE  
10 MONEY THAT'S REQUIRED TO DO THE JOB. LET'S DO IT.

11 AND I THINK FROM MY OWN POINT OF VIEW WHEN  
12 I WAS WORKING ON IT, ONE OF THE THINGS THAT EVERY  
13 TIME HAPPENED TO ME WAS THAT THEY CUT BACK 10  
14 PERCENT OR 20 PERCENT IN THE PROJECT, AND IT JUST  
15 MADE IT SO MUCH HARDER TO DO IT. IN FACT, WE OFTEN  
16 DIDN'T DO PART OF IT BECAUSE THE MONEY WOULDN'T  
17 REACH THAT DISTANCE.

18 THE STEM CELL PATHWAYS, THE BASIC SIDE OF  
19 IT, THE RENEWAL, THE DEVELOPMENT OF PLURIPOTENTIAL  
20 STEM CELLS, AND THEN THE DIFFERENTIATION OUT INTO  
21 THE PRIMARY LINEAGES OF MESODERM, ENDODERM, AND  
22 ECTODERM, THEY'RE THE PRIMARY GERM LINEAGES. AND  
23 THE DIFFERENTIATION PROGRAMS ARE MOVING REALLY QUITE  
24 QUICKLY, AND THEY'RE STARTING TO SETTLE DOWN INTO  
25 SOME REALLY ACCEPTABLE DIFFERENTIATION PATHWAYS, AND

## BARRISTERS' REPORTING SERVICE

1 IT'S GIVING US OPPORTUNITIES TO DO A LOT OF  
2 DIFFERENT THINGS, INCLUDING TISSUE ENGINEERING.  
3 WE'RE STARTING TO GROW THE CELLS IN ASSOCIATION WITH  
4 SCAFFOLDS. WE'RE LOOKING TOWARDS THE CELL THERAPIES  
5 IN ANIMAL MODELS AND TRANSPLANTATION AND, HENCE,  
6 IMMUNOLOGY IS BECOMING IMPORTANT THERE.

7 THE OPPORTUNITY FOR DRUG DISCOVERY IS  
8 RAPIDLY COMING TO THE FORE, PARTICULARLY WITH SOME  
9 OF THE LARGE ENTITIES WHO USE HIGH THROUGHPUT  
10 TECHNOLOGIES IN A VERY MAJOR WAY. THERE ARE A LOT  
11 OF MOLECULES THAT HAVE BEEN IDENTIFIED THAT COULD DO  
12 THE JOBS THAT WE THINK THAT THE CELLS MIGHT DO. SO  
13 THERE'S A LOT OF INTERESTING DRUGS COMING THROUGH  
14 THAT PIPELINE THAT TEND TO MORE FIT INTO THE DRUG  
15 DISCOVERY MODEL, BUT THEY'RE COMING ON BOARD VERY  
16 QUICKLY.

17 WE HAVE THE OPPORTUNITY OF LOOKING AT  
18 ENVIRONMENTAL TOXICOLOGY USING LIVER CELLS AND HEART  
19 CELLS AND ALSO THE POSSIBILITY OF DELIVERING GENE  
20 THERAPIES USING CELLS AS VEHICLES RATHER THAN VIRAL  
21 CONSTRUCTS. SO THERE'S A LOT OF OPPORTUNITY HERE.

22 WHAT ARE THE PRIMARY TARGETS FOR US AT THE  
23 MOMENT? WE SEE THEM IN THIS KIND OF FLOW HERE, THAT  
24 THE BASIC DISCOVERY IN STEM CELL BIOLOGY WILL REMAIN  
25 ALWAYS IMPORTANT TO US. TOOLS AND TECHNOLOGIES TO

## BARRISTERS' REPORTING SERVICE

1 DRIVE BASIC RESEARCH AND TRANSLATION, NEW MOLECULES  
2 AND THERAPEUTIC APPLICATIONS BASED ON STEM CELL  
3 RESEARCH, SO WE'RE INTERESTED IN THAT AND PROMOTING  
4 IT, BRINGING IT THROUGH TO THE CLINIC. MOBILIZATION  
5 OF ENDOGENOUS STEM CELLS FOR TISSUE REPAIR. I THINK  
6 THERE'S A GOOD CASE STILL FOR MOLECULES THERE THAT  
7 CAN RELEASE CELLS FROM THEIR STEM CELL STATE.  
8 IDENTIFICATION OF ABERRANT STEM CELLS, SUCH AS  
9 CANCER STEM CELLS, CELL THERAPIES, OF COURSE, GENE  
10 THERAPIES, AND TISSUE RECONSTRUCTION.

11 WHAT TO EXPECT. EVERYONE WILL HAVE A  
12 DIFFERENT LIST, BUT I CLEARLY THINK THERE WILL BE  
13 NEW MOLECULES, AND THEY'RE ALREADY COMING INTO IND'S  
14 THAT WILL HAVE AN INFLUENCE, HOPEFULLY PREVENT  
15 CANCERS, ENABLE EX VIVO STEM CELL EXPANSION AND  
16 DIFFERENTIATION AND TOLERANCE. THESE MOLECULES ARE  
17 APPEARING ALREADY. SPINAL CORD REPAIR, WE HAVE A  
18 CLINICAL TRIAL NOW FOR HUMAN EMBRYONIC STEM  
19 CELL-DERIVED CELLS. RETINAL EPITHELIAL REPAIR I  
20 THINK IS VERY MUCH ON THE HORIZON. I EXPECT A  
21 NUMBER OF THOSE GRANTS TO APPEAR IN THE DISEASE  
22 TEAMS.

23 BETA ISLET CELLS FOR DIABETICS, CERTAINLY  
24 A LOT OF EFFORT GOING IN THERE. CARDIAC MUSCLE  
25 CELLS AND PROGENITORS, THE CELLS THEMSELVES OR AS

## BARRISTERS' REPORTING SERVICE

1 PATCH SCAFFOLDS. VERY INTERESTING TECHNOLOGY THAT'S  
2 STARTING TO COME OUT. NEURAL STEM CELLS, FOR  
3 EXAMPLE, LYSOSOMAL STORAGE DISEASES OR THE MYELIN  
4 REPLACING OLIGODENDROCYTE-TYPE CELLS, THEY'RE GOING  
5 TO APPEAR. TARGETING OF METASTATIC CANCER CELLS, WE  
6 HOPE THAT WE'LL END UP WITH MOLECULES AND ANTIBODIES  
7 THAT WILL TARGET THESE CELLS BASED ON STEM CELL  
8 EXPERIMENTS. AND BECAUSE I USED TO WORK IN THE  
9 AREA, I BELIEVE THE LUNG IS A GREAT TARGET FOR STEM  
10 CELLS. SO REPAIR OF INFLAMMATORY LUNG FIBROSIS, I  
11 THINK, WILL ALSO BE EARLY IN THE CLINIC.

12 SO IF YOU LOOK AT WHAT CAN BE ACHIEVED  
13 FROM THESE PLURIPOTENTIAL STEM CELLS OR FROM  
14 PROGENITOR CELLS THAT YOU CAN FIND IN THE PATHWAYS  
15 OR REFORMATTED ADULT STEM CELLS THAT MAY HAVE ONLY  
16 BEEN DRIVEN BACK PART OF THE WAY OR ALL THE WAY BACK  
17 TO PLURIPOTENTIALITY, WE'RE GOING TO HAVE CELL  
18 THERAPIES COMING. STEM CELL MOBILIZATION OF SMALL  
19 MOLECULES, IT'S THERE. I THINK THE REVOLUTION IS  
20 NOW ON. I THINK THEY'RE GOING TO APPEAR IN THE  
21 CLINIC, AND I THINK CIRM OUGHT TO BE PART OF THE  
22 VEHICLE IN DELIVERING THAT.

23 SO OUR KIND OF PROVISIONAL PROGRAMS, LOOK  
24 AT SOME OF THOSE HERE AT THE BOTTOM WHERE I'VE GOT  
25 THAT BENT ARROW, WILL BE THE PROGRAMS WHICH WILL

## BARRISTERS' REPORTING SERVICE

1 ROTATE ON A 12- TO 18-MONTH BASIS. SO THESE ARE THE  
2 SO-CALLED CORE PROGRAMS: EARLY TRANSLATION, DISEASE  
3 TEAMS, AND BASIC SCIENCE, THAT THEY WILL CONTINUE TO  
4 DO THOSE. AND WE'LL ALSO THEN HAVE MULTIPLES WHERE  
5 NECESSARY. TOOLS AND TECHNOLOGIES, TRAINING GRANTS,  
6 AND THE TYPE OF BRIDGES PROGRAMS TO BRING  
7 TECHNICIANS THROUGH FROM THE CALIFORNIA COLLEGE  
8 SYSTEM INTO THE AREA.

9 SO IF YOU SEE IT LIKE THAT, THEN THAT'S  
10 THE WAY WE ARE HOPING TO FORMAT IT. IMMUNOLOGY IS  
11 SHOWN THERE AS A SPECIAL ONCE-OFF PROGRAM. WE MAY  
12 NEED TO DO MULTIPLES OF THAT, BUT WE SEE IT'S  
13 IMPORTANT TO HIT THINGS WHICH ARE A DEFICIT IN THE  
14 SYSTEM, A ROADBLOCK, IF YOU LIKE. AND IT'S THE WAY  
15 WE'RE SEEING IT.

16 NOW, THAT'S A VERY DIFFERENT WAY WE'RE  
17 LOOKING AT OUR PROGRAM THAN THE WAY WE HAD IT. WE  
18 WOULD HAVE BEEN EXPECTED TO DO 12 TO 15 RFA'S A  
19 YEAR. AND I CAN SEE MARIE SHAKING HER HEAD. IT'S  
20 JUST NOT POSSIBLE TO DO THAT IF WE WERE STICKING TO  
21 THE ORIGINAL PLAN. WE WANT A MORE COHERENT PLAN.  
22 WE WANT PEOPLE TO UNDERSTAND WHAT OUR PLAN IS AND BE  
23 ABLE TO PLAN THEMSELVES AS SCIENTISTS OR AS  
24 COMPANIES FOR COMING INTO OUR PROGRAMS. SO THAT'S  
25 AN IMPORTANT COMPONENT.

## BARRISTERS' REPORTING SERVICE

1 WHERE DO WE REALLY FIT? AND IT'S A GOOD  
2 QUESTION THAT WE'VE BEEN ASKING THE COMPANIES.  
3 WE'VE ASKED THE LAST PUBLIC SESSION THAT WE HAD IN  
4 LOS ANGELES. WHAT'S REALLY HAPPENING HERE NOW THAT  
5 THE PRESIDENT HAS REALLY MADE HIS PROCLAMATION TO  
6 REMOVE THE NEGATIVITY THAT WAS IN THE BUSH  
7 ADMINISTRATION ABOUT EMBRYONIC STEM CELLS? WE  
8 EXPECT NIH TO COME INTO THE BASIC END IN A MUCH MORE  
9 FULSOME WAY. WE EXPECT MORE FUNDING TO COME INTO  
10 THAT END.

11 I ALSO THINK, BECAUSE I SPENT A LOT OF  
12 TIME TALKING TO MANY INDIVIDUALS IN THE PHRMA AND  
13 THE BIOTECH SECTOR, THAT THE PHARMACEUTICAL INDUSTRY  
14 IS BACKING UP TO THIS AREA. THEY'VE ALL GOT  
15 REGENERATIVE MEDICINE COMPONENTS, AND THEY'VE EVEN  
16 GOT CELL THERAPIES, MOST OF THEM HAVE GOT CELL  
17 THERAPY COMPONENTS. THEY'RE INTERESTED. THEY  
18 PROBABLY WILL DO IT BY MAKING TRADE BUY-INS AND  
19 BUYING SOME OF THE BIOTECH COMPANIES THAT ARE  
20 SUCCESSFUL. THEY'RE BACKING INTO THIS END.

21 WOULDN'T OUR NATURAL NICHE BE SOMEWHERE  
22 BETWEEN THE BASIC SCIENCE AND THE CLINIC BECAUSE  
23 THIS SO-CALLED VALLEY OF DEATH OR VALLEY OF  
24 OPPORTUNITY, WHICHEVER WAY YOU WANT TO PUT IT, IS  
25 SOMETHING THAT WE COULD ACTUALLY -- WE COULD BE THE

## BARRISTERS' REPORTING SERVICE

1 CONDUIT FOR CONNECTING THE TWO ENDS. I THINK THAT  
2 THAT'S WHERE WE SHOULD BE. I THINK IT'S A NATURAL  
3 NICHE FOR US. IT'S NOT THAT WE WANT TO GO OUT OF  
4 THE BASIC OR, IN FACT, NOT DO ANY CLINICAL, BUT WE  
5 REALLY WANT TO SEE IF WE CAN MAKE THIS DISCOVERY GO  
6 THROUGH TO THE CLINIC. IF WE CAN DO THAT, THEN  
7 THAT'S PRIMARY TO OUR MISSION. SO WE'D BE  
8 INTERESTED IN WHAT YOU THINK ABOUT THAT.

9 THERE ARE INTERESTING NEW SYSTEMS COMING  
10 INTO PLAY. THE HIGH THROUGHPUT SCREENS FOR SMALL  
11 MOLECULES ARE REALLY NOW STARTING TO COUNT BECAUSE  
12 THEY'RE ALL USING THE STEM CELL ASSAYS THAT THE  
13 BASIC SCIENTISTS HAVE WORKED OUT. SO NOW YOU CAN  
14 SEE QUICKLY THAT THOSE ASSAYS ARE MOVING INTO THE  
15 HIGH THROUGHPUT SCREENS, AND LOTS OF MOLECULES WILL  
16 START TO PERCOLATE OUT.

17 BUT THERE ARE NEW NOVEL MODEL SYSTEMS.  
18 THERE'S PERSONALIZED MEDICINE OPPORTUNITIES FROM IPS  
19 CELLS. THE RECENT DEMONSTRATION THAT YOU CAN EXCISE  
20 ALL YOUR CONSTRUCT FROM IPS CELLS MEANS THAT THEY  
21 COULD BE USED CLINICALLY, I THINK, IN THE FUTURE. I  
22 DON'T THINK THERE'S MUCH DOUBT ABOUT THAT. THINGS  
23 HAVE CHANGED. BUT THE OPPORTUNITY IS GRAND, AND I  
24 THINK IT'S WHAT WE SHOULD BE DOING. AND THAT'S WHY  
25 WE'VE SORT OF DECIDED TO GET SOMEONE LIKE ARNOLD

## BARRISTERS' REPORTING SERVICE

1 KRIEGSTEIN TO GIVE YOU A VIEW OF HOW IT IS TO GO  
2 FROM THE BASIC END TO THE CLINIC BECAUSE HE'S DONE  
3 IT. HE'S ONE OF THOSE SCIENTISTS THAT'S GONE THAT  
4 DISTANCE AND KNOWS WHAT THE PITFALLS AND  
5 DIFFICULTIES ARE.

6 JUST IN MY LAST SLIDE, JEFF, IS TO NOTE  
7 THAT WE'VE MADE SOME AGREEMENTS WITH COUNTRIES  
8 OVERSEAS SHOWN HERE AS CANADA, JAPAN, SPAIN, UK, AND  
9 VICTORIA FOR COLLABORATIVE GRANTING OF PROJECTS. SO  
10 IF THE SCIENTISTS COME TOGETHER FROM THOSE COUNTRIES  
11 AND CALIFORNIA, THOSE COUNTRIES WILL FUND THEIR  
12 COMPONENT AND WE WILL FUND THE CALIFORNIA COMPONENT.  
13 WE ALREADY HAVE ONE GOING WITH THE VICTORIANS IN THE  
14 EARLY TRANSLATIONAL PROGRAMS. I THINK WE HAVE TO  
15 SAY THAT IT WAS REALLY INTERESTING. I CAN'T TELL  
16 HOW WELL IT WENT, BUT I THINK IT WAS INCREDIBLY  
17 INTERESTING.

18 I THINK THERE'S AN OPPORTUNITY TO GATHER  
19 THE REST OF THE WORLD AND NOW THE U.S. THROUGH THE  
20 NIH AND THE FDA FOR A REALLY CONCERTED GLOBAL EFFORT  
21 TO CHALLENGE THESE HUGE DISEASES, THESE MASSIVE  
22 PROBLEMS WITH A NEW TYPE OF MEDICINE. AND WHY NOT?  
23 WHY NOT US GIVE IT A REAL GO? AND SO INSTEAD OF  
24 DUPLICATING WHAT OUR COLLEAGUES ARE DOING OVERSEAS,  
25 LINK ARMS WITH THEM AND SEE IF WE CAN MAKE IT HAPPEN

## BARRISTERS' REPORTING SERVICE

1 MORE EFFECTIVELY AND MORE EFFICIENTLY. THAT'S WHAT  
2 WE HOPE.

3 NOW, IF I MAY, JEFF, I COULD HAND OVER TO  
4 ARNOLD TO GIVE YOU WHAT REALLY IS THE GENUINE  
5 EXPERIENCE OF SOMEONE WHO'S TAKEN IT FOR THE  
6 RUN-THROUGH FROM THE BASIC TO THE CLINICAL.

7 DR. KRIEGSTEIN: SO FIRST I WANT TO THANK  
8 ALAN FOR INVITING ME. I CERTAINLY APPRECIATE THE  
9 OPPORTUNITY TO TALK HERE TODAY. HOWEVER, I'D LIKE  
10 TO ALTER A LITTLE BIT MY COMMENTS TO ADDRESS WHAT I  
11 THINK IS THE REAL PURPOSE OF THIS MEETING, WHICH ARE  
12 THE STRATEGIC PLANS FOR THE CIRM, HOW THEY PROPOSE  
13 TO FUND THIS EFFORT IN THE NEXT FIVE OR EIGHT YEARS,  
14 WHATEVER THE REST OF OUR PERIOD MIGHT BE, AND MAKE  
15 SOME COMMENTS ABOUT WHAT I CONSIDER ARE CAUTIONS IN  
16 TERMS OF AREAS THAT PROBABLY DO, IN FACT, MERIT  
17 INVESTIGATION AND FUNDING AND THE NEED TO BE PUSHED  
18 AND PURSUED AND OTHER AREAS THAT I THINK MAYBE WE  
19 SHOULD RECONSIDER.

20 SINCE WE'RE TALKING ABOUT THE STRATEGIC  
21 PLAN, I WANTED TO JUST GIVE A FEW EXAMPLES. FIRST,  
22 I WANT TO MENTION WHAT'S ALREADY BEEN DONE, THE  
23 ACCOMPLISHMENTS OF THE CIRM, MANY OF WHICH YOU JUST  
24 HEARD ABOUT. FROM THE PERSPECTIVE OF A CONSUMER,  
25 I'D LIKE TO SAY THE TRAINING OF THE NEXT GENERATION

## BARRISTERS' REPORTING SERVICE

1 OF STEM CELL SCIENTISTS WAS A KEY STEP AND I THINK A  
2 VERY INSIGHTFUL ONE TO BEGIN THE PROGRAM. WE NOW  
3 HAVE STUDENTS AND POST DOCS AND FELLOWS WHO HAVE  
4 BEEN TRAINED IN STEM CELL BIOLOGY, AND MANY OF THEM  
5 SPECIFICALLY IN HUMAN EMBRYONIC STEM CELLS. SO  
6 THEY'RE PERFECTLY POSITIONED TO TAKE ADVANTAGE OF  
7 THE CHANGE IN NIH POLICY NOW.

8 THE PROMOTION OF HUMAN STEM CELL  
9 EXPERIMENTATION SPECIFICALLY HAS TURNED OUT TO BE  
10 ACTUALLY A VERY INSIGHTFUL STEP FOR THE CIRM. WE  
11 HAVE FACILITIES AND LABORATORIES HERE AT UCSF AND  
12 NOW ELSEWHERE ALL OVER CALIFORNIA THAT ARE, AGAIN,  
13 VERY WELL POSITIONED TO TAKE ADVANTAGE OF NIH  
14 FUNDING NOW FOR NEWLY DEVELOPED CELL LINES.  
15 INVESTIGATORS HAVE COME TO CALIFORNIA FROM ALL OVER  
16 THE COUNTRY, IN FACT, ALL OVER THE WORLD, WHICH HAS  
17 INVIGORATED THE CALIFORNIA POTENTIAL FOR YEARS AND  
18 YEARS TO COME. CAREER DEVELOPMENT HAS BEEN  
19 SUPPORTED BY THE CIRM, WHICH HAS BEEN CRITICAL FOR  
20 RECRUITMENT AS WELL AS FOR DEVELOPMENT OF OUR  
21 FACULTY. AND THE CALIFORNIA STEM CELL INDUSTRY HAS  
22 BEEN SEEDED HERE, WHICH I THINK IS GOING TO BEAR  
23 FRUIT, AS MOST OF US ARE HOPING, IN THE NEXT TEN TO  
24 15 YEARS. AND THEY'VE CREATED A PARADIGM FOR GRANT  
25 MANAGEMENT, WHICH I THINK THE NIH IS NOW GOING TO

## BARRISTERS' REPORTING SERVICE

1 MODEL WHEN IT COMES TO THEIR STIMULUS PACKAGE IN  
2 TRYING TO GET GRANTS OUT THE DOOR IN UNHEARD OF  
3 EFFICIENCY.

4 AND NOW THE EFFORT IS TO DRIVE SOME OF  
5 THESE DISCOVERIES TO THE CLINIC. IT'S IN THIS AREA  
6 THAT I WANTED TO SPEND THE REST OF MY TIME TALKING  
7 ABOUT CLINICAL STEM CELL THERAPIES AND APPLICATIONS.  
8 I KNOW THIS AUDIENCE PROBABLY DOESN'T NEED THE  
9 REFRESHER, BUT I WANTED TO MENTION THE DIFFERENT  
10 WAYS WE NOW HAVE OF MAKING STEM CELLS. THERE'S THE  
11 TRADITIONAL HUMAN EMBRYONIC STEM CELL APPROACH FROM  
12 THE BLASTOCYST EMBRYO, WHICH HAS NOW BECOME A  
13 CLASSIC PARADIGM, ADULT STEM CELLS, OF COURSE, WHICH  
14 EXIST AS RESIDENT CELLS IN A VARIETY OF ORGANS IN  
15 THE ADULT BODY, AND THEN THE NEW APPROACH OF  
16 REPROGRAMMING, USING SKIN CELLS OR OTHER SOMATIC  
17 CELLS FROM AN ADULT, A PATIENT, FOR INSTANCE, WITH A  
18 DISEASE AND THEN TRANSFORMING THEM INTO A STABLE  
19 STEM CELL LINE.

20 AND NOW WITH THE NIH CHANGE IN POLICY, WE  
21 REALLY HAVE THE ABILITY, WHICH I THINK IS NOW  
22 UNPRECEDENTED, TO LOOK AT ALL THESE DIFFERENT CELL  
23 LINE POTENTIALS AND COMPARE THEM HEAD TO HEAD IN THE  
24 SAME NIH-FUNDED LABORATORIES OR LABORATORIES WITH  
25 MIXED FUNDING FROM PRIVATE AND FEDERAL SOURCES. SO

## BARRISTERS' REPORTING SERVICE

1 I THINK THIS IS A REALLY FABULOUS OPPORTUNITY FOR  
2 SCIENTISTS WHO ARE IN THE FIELD OR THOSE WHO WANT TO  
3 ENTER THE FIELD NOW.

4 THE PUSH TO GETTING THERAPIES OUT INTO THE  
5 CLINIC, I THINK, HAS SOME RISKS THAT WE SHOULD BE  
6 ALL AT LEAST AWARE OF. FIRST IS THE POTENTIAL THAT  
7 WE'LL LEARN VERY LITTLE AND AT POTENTIALLY GREAT  
8 COST. WHEN I SAY GREAT COST, WHAT I'M CONCERNED  
9 WITH IS THE POTENTIAL FOR DOING HARM, THAT THERE MAY  
10 BE PATIENTS WHO DEVELOP ADVERSE EVENTS OR TUMORS,  
11 AND I THINK THAT IS A REAL RISK.

12 THE OTHER THING WE HAVE TO KEEP AWARE OF  
13 AS AN EXPERIMENT, WHICH, IN FACT, THE DELIVERY OF  
14 STEM CELL THERAPIES TO PATIENTS REALLY WILL BE IN  
15 THE INITIAL STEPS, WE NEED TO TRY TO LEARN AS MUCH  
16 AS WE CAN ABOUT WHAT'S HAPPENING TO THESE CELLS AND  
17 WHAT'S HAPPENING TO THE PATIENTS. I THINK WE NEED  
18 TO MAKE SURE THERE'S MECHANISMS FOR ACHIEVING SOME  
19 OF THESE GOALS, TRACKING THE CELLS. WHERE DO THEY  
20 GO? WHAT KINDS OF CELLS DO THEY BECOME? DO THEY  
21 EVEN SURVIVE IN THE PATIENTS?

22 ADVERSE EVENTS WILL BE EASIER, IN FACT,  
23 THAN THOSE OTHER QUESTIONS TO DETECT. TUMORS, I  
24 THINK, WILL DECLARE THEMSELVES. IMMUNE  
25 COMPLICATIONS, HEMORRHAGES, BLEEDING COMPLICATIONS,

## BARRISTERS' REPORTING SERVICE

1 INFECTION, ALL THE REST OF THOSE THINGS. I THINK  
2 THE ADVERSE EVENTS WE'LL LEARN ABOUT EASILY ENOUGH.

3 MY CONCERN IS THAT WE MAY NOT LEARN ABOUT  
4 THOSE FIRST SET OF QUESTIONS, WHICH ARE REALLY  
5 CRITICAL AND CAN'T REALLY BE UNRAVELED IN ANIMAL  
6 MODELS.

7 AND SO LET ME JUST MENTION A FEW SPECIFIC  
8 CASES JUST TO SUPPORT SOME OF THESE NOTIONS. MANY  
9 OF YOU KNOW THERE'S ALREADY A CLINICAL TRIAL UNDER  
10 WAY FOR BATTEN'S DISEASE, AND THIS IS BASED ON THE  
11 NOTION THAT THESE STEM CELLS WILL ACT AS DELIVERY  
12 VEHICLES FOR A MISSING ENZYME. I BELIEVE SIX  
13 PATIENTS HAVE SO FAR BEEN GRAFTED WITH NEURAL STEM  
14 CELLS.

15 I SHOULD MENTION THAT THESE ARE STEM  
16 CELLS. THEY AREN'T DIFFERENTIATED INTO NEURONS OR  
17 OLIGODENDROCYTES OR ANY OTHER TYPE OF CELL. THEY'RE  
18 GIVEN IN THEIR RELATIVELY UNDIFFERENTIATED NEURAL  
19 STEM STATE. SO THEY HAVE THE POTENTIAL TO TURN INTO  
20 NERVE CELLS OR GLIAL CELL SUPPORT CELLS OR  
21 OLIGODENDROCYTES.

22 SO FAR THERE HAVE BEEN NO ADVERSE EVENTS  
23 REPORTED, AS FAR AS WE KNOW NO TUMORS. BUT WE DON'T  
24 KNOW FOR SURE THESE PATIENTS HAVE BEEN FOLLOWED LONG  
25 ENOUGH. MANY OF YOU ARE PROBABLY AWARE OF THE PAPER

## BARRISTERS' REPORTING SERVICE

1 IN *PLOS MEDICINE* MENTIONING THAT THERE WAS A PATIENT  
2 TREATED WITH CELLS, NOT TOO UNLIKE THESE NEURAL STEM  
3 CELLS, IN RUSSIA AND WHO DEVELOPED AFTER FOUR YEARS  
4 MULTIFOCAL TUMORS. HOW LONG WILL IT TAKE TO HAVE TO  
5 MONITOR PATIENTS LIKE THIS BEFORE WE KNOW WHETHER  
6 THOSE COMPLICATIONS ARE REAL OR NOT IN THIS  
7 PARTICULAR CELL TREATMENT?

8 WHERE DO THE CELLS GO WHEN THEY'RE  
9 INJECTED IN THIS CASE INTO THESE CHILDREN? THE  
10 PROBLEM IS THAT THE CELLS NEED TO BE DETECTED. AND  
11 AS FAR AS I KNOW, THERE ARE NO MARKERS ON THESE  
12 CELLS. THEY WEREN'T ABLE TO GENETICALLY MANIPULATE  
13 THEM OR TAG THEM IN SOME WAY. SO THE QUESTION IS  
14 WILL WE ACTUALLY LEARN WHAT'S HAPPENED TO THE CELLS  
15 ONCE THEY'RE DELIVERED? WHAT KINDS OF CELLS HAVE  
16 THEY BECOME? DID THEY TURN INTO ASTROCYTES OR  
17 OLIGODENDROCYTES OR NERVE CELLS? HOW FAR HAVE THEY  
18 MIGRATED? DID THEY WIND UP OTHER ORGANS? HAVE THEY  
19 EVEN SURVIVED IN THE PATIENTS? AND, IN FACT, HAVE  
20 THEY PRODUCED THE LYSOSOMAL ENZYME REPLACEMENTS THAT  
21 EVERYONE HAD HOPED FOR?

22 SO THESE ARE THE KINDS OF QUESTIONS, I  
23 THINK, WE'D LIKE TO LEARN FROM STUDIES LIKE THIS,  
24 BUT THEY'RE NOT THE PRIMARY FOCUS OF THE STUDY, AND  
25 I'M NOT ENTIRELY SURE YET WHETHER WE'LL ACTUALLY

## BARRISTERS' REPORTING SERVICE

1 HAVE ANSWERS TO SOME OF THOSE QUESTIONS.

2 AND THEN WE HAVE THE SPINAL CORD INJURY  
3 TRIAL, WHICH IS NOT STARTED YET, BUT THE FDA HAS  
4 GIVEN APPROVAL FOR THAT. AND THIS INVOLVES HUMAN  
5 EMBRYONIC STEM CELL-DERIVED OLIGODENDROCYTES, AT  
6 LEAST THEORETICALLY THAT'S WHAT THESE CELLS WILL  
7 BECOME, AND THEY WILL HOPEFULLY MYELINATE AXONS IN  
8 PATIENTS WHO HAD ACUTE SPINAL CORD INJURY. AND THE  
9 INITIAL TRIAL IS A PHASE I SAFETY TRIAL OF EIGHT TO  
10 TEN PATIENTS WHO WILL BE TREATED JUST WITHIN A WEEK  
11 OR TWO OF HAVING THEIR SEVERE SPINAL CORD INJURY.

12 SO, ONCE AGAIN, SAME SET OF QUESTIONS.  
13 WILL WE LEARN ANYTHING ABOUT THESE CELLS? WILL  
14 THERE BE A WAY OF TRACKING THE CELLS, OF KNOWING  
15 EITHER IN THE LIVING PATIENTS OR LATER ON WHAT'S  
16 HAPPENED TO THE CELLS? WHERE HAVE THEY MIGRATED TO?  
17 WHERE HAVE THEY GONE? WHAT KINDS OF CELL TYPES HAVE  
18 THEY BECOME? HOW MANY OF THEM ARE ACTUALLY  
19 OLIGODENDROCYTES? HOW MANY OF THEM HAVE SURVIVED IN  
20 THE SPINAL CORD LESION? AND HAVE THEY ACTUALLY  
21 MYELINATED THE HOST AXONS AS HOPED? WILL THERE BE  
22 SOME WAY OF ACTUALLY ANSWERING ANY OF THOSE  
23 QUESTIONS? IT'S UNCLEAR TO ME, AND MAYBE THERE WILL  
24 BE, BUT I'M NOT SURE.

25 AND THEN FINALLY, I THINK A COMPLICATION

## BARRISTERS' REPORTING SERVICE

1     HERE IS HOW WILL CLINICAL IMPROVEMENT BE  
2     INTERPRETED? IN PATIENTS WHO HAVE SPINAL CORD  
3     INJURY ACUTELY IN THE FIRST FEW WEEKS OR SO, THEY  
4     EXPERIENCE A GREAT DEAL OF SWELLING, THERE'S  
5     INFLAMMATION. THERE ARE A LOT OF CHANGES IN THAT  
6     SPINAL CORD THAT WILL ACTUALLY GO AWAY OVER TIME.  
7     AND SO MOST PATIENTS WILL SHOW SOME DEGREE OF  
8     IMPROVEMENT FOLLOWING THAT ACUTE, SUBACUTE PHASE.  
9     IF THESE PATIENTS SHOW THAT EXPECTED DEGREE OF  
10    IMPROVEMENT, HOW WILL WE ACTUALLY KNOW WHETHER ANY  
11    ADDITIONAL IMPROVEMENT MIGHT HAVE BEEN CAUSED BY  
12    THESE CELLS THAT ARE DELIVERED? AND, OF COURSE, THE  
13    QUESTION REALLY ISN'T WHETHER THERE IS OR ISN'T  
14    IMPROVEMENT. THE QUESTION IS HOW IS THIS GOING TO  
15    BE PORTRAYED TO THE PUBLIC? IS THIS GOING TO BE A  
16    PHASE I TRIAL THAT SHOWS HOPEFULLY THAT THESE CELLS,  
17    IN FACT, SHOW SOME -- THAT THE PATIENTS HAVE SHOWED  
18    SOME SIGN OF CLINICAL IMPROVEMENT; THEREFORE,  
19    ENCOURAGING THE MOVEMENT TO A PHASE II TRIAL? WILL  
20    THERE BE ANY WAY TO KNOW WHETHER THE COURSE OF THESE  
21    INITIAL GROUP OF PATIENTS HAS BEEN AFFECTED IN ANY  
22    WAY? WILL THAT REQUIRE A LARGER TRIAL? AND THEN,  
23    AGAIN, HOW LONG WILL THE PATIENTS HAVE TO BE  
24    FOLLOWED BEFORE WE KNOW WHETHER IT'S TRULY SAFE?  
25                SO THERE'S SEVERAL ADDITIONAL NEEDS, I

## BARRISTERS' REPORTING SERVICE

1 THINK, FOR STEM CELL TRIALS THAT ARE AREAS WHERE THE  
2 CIRM MAY FOCUS SOME ATTENTION. BETTER TOXICITY  
3 MODELS ARE NEEDED. LONG-TERM MONITORING, FOR  
4 EXAMPLE. RIGHT NOW A YEAR IN AN IMMUNODEPRIVED RAT  
5 MAY NOT BE A SUFFICIENT MODEL ESPECIALLY FOR STEM OR  
6 PROGENITOR CELL TUMORS WHERE THE TURNOVER RATE MIGHT  
7 BE A LOT SLOWER THAN IN HUMAN CELLS, A LOT SLOWER  
8 THAN IN ANIMAL CELLS, AND EVEN SLOWER THAN IN HUMAN  
9 TUMOR CELLS.

10 THERE'S A PROBLEM BECAUSE XENOGRAPHS, THAT  
11 IS THE ABILITY TO PUT HUMAN CELLS INTO AN ANIMAL  
12 MODEL TO LOOK AT TOXICITY, IS A REAL CHALLENGING  
13 ISSUE. HUMAN CELLS DON'T SURVIVE WELL IN NONHUMAN  
14 PRIMATES, SO YOU CAN'T REALLY LOOK AT LONG-TERM  
15 TUMOR FORMATION, FOR INSTANCE, IN A MONKEY WITH A  
16 HUMAN CELL GRAFT. PERHAPS A BETTER WAY TO DO THAT  
17 MIGHT BE AN ALLOGRAFT; THAT IS, MONKEY STEM CELLS  
18 CAN SURVIVE IN MONKEYS, AND MAYBE THAT'S A BETTER  
19 MODEL TO LOOK AT FOR A POSSIBLE TOXICITY. THE  
20 PROBLEM, OF COURSE, IS THAT THOSE MONKEY CELLS  
21 AREN'T GOING TO BE THE HUMAN CELL LINES THAT YOU'D  
22 LIKE TO USE FOR THE ACTUAL THERAPIES WE'RE ALL  
23 HOPING FOR.

24 SO IN MANY WAYS I THINK THE TECHNOLOGY HAS  
25 A BIT OUTPACED OUR UNDERSTANDING OF WHAT'S GOING ON.

## BARRISTERS' REPORTING SERVICE

1 MANY OF THE MAJOR BREAKTHROUGHS THAT WE'RE ALL VERY  
2 EXCITED ABOUT IN STEM CELL BIOLOGY HAVE REALLY COME  
3 MORE FROM THE BASIC SCIENCE END OF THE SPECTRUM, NEW  
4 WAYS OF CREATING STEM CELLS LIKE THE IPS TECHNOLOGY,  
5 NEW WAYS OF MAKING THEM SAFER USING THE PIGGYBACK  
6 TECHNIQUES, THINGS THAT HAVE JUST BEEN PUBLISHED IN  
7 THE LAST FEW WEEKS, THESE ARE VERY EXCITING  
8 BREAKTHROUGHS THAT REALLY HAVE THE POTENTIAL TO  
9 CHANGE THE WHOLE LANDSCAPE. AND THOSE HAVE REALLY  
10 COME OUT OF MORE OF A BASIC SCIENCE END OF THE  
11 SPECTRUM, WHICH IS, IN MY VIEW, WHERE I THINK WE  
12 STILL NEED TO FOCUS A GREAT DEAL OF OUR EFFORTS. I  
13 THINK THAT'S WHERE IN THE LONG TERM WE CAN MAKE THE  
14 BIGGEST IMPACT.

15 I THINK THAT NIH, AS WELL AS THE CIRM,  
16 SHOULD INVEST IN THE BASIC BIOLOGY OF BOTH STEM  
17 CELLS AND IN THE RELATED AREAS OF DEVELOPMENTAL  
18 BIOLOGY THAT REALLY INFORM MANY OF THE STEM CELL  
19 STRATEGIES. THAT'S WHAT'S NEEDED TO REALLY BUILD A  
20 FOUNDATION OF STEM CELL SCIENCE, WHICH I THINK WILL  
21 HAVE THE LONGEST IMPACT WELL BEYOND, SAY, THE TENURE  
22 OF THE CIRM. SO I THINK THERE ARE CLEARLY AREAS  
23 THAT ARE MATURE ENOUGH TO START THINKING ABOUT  
24 CLINICAL APPLICATIONS.

25 I'D LIKE TO CLOSE JUST BY MENTIONING

## BARRISTERS' REPORTING SERVICE

1 ACTUALLY WHAT ALAN ASKED ME TO TALK ABOUT, AN  
2 EXAMPLE, FOR INSTANCE, OF A STEM CELL THERAPY THAT  
3 MAY MOVE INTO THE CLINIC WITHIN THE FOUR TO FIVE  
4 YEARS. AND THAT'S HAPPENING HERE AT UCSF, AND  
5 THAT'S PROBABLY THE DIABETES PROGRAM.

6 WE'VE ORGANIZED, BY THE WAY, OUR STEM CELL  
7 PROGRAM ALONG DISEASE-ORIENTED PIPELINES. AND ONE  
8 OF THEM, THE ENDOCRINE PIPELINE, IS CO-DIRECTED BY  
9 JEFF BLUESTONE IN PARTNERSHIP WITH NOVOCCELL, A  
10 COMPANY DOWN IN SAN DIEGO. THEY'RE PLANNING A  
11 DISEASE TEAM GRANT TO TACKLE DIABETES, ESPECIALLY  
12 TYPE 1 DIABETES. AND THE STRATEGY WILL BE TO USE  
13 ISLET-LIKE CELLS THAT ARE DERIVED FROM HUMAN  
14 EMBRYONIC STEM CELLS AND IMPLANT THEM INTO PATIENTS  
15 INITIALLY, OF COURSE, AS A SAFETY TRIAL TO SEE IF  
16 THEY CAN REGULATE THEIR INSULIN SECRETION. AND AS A  
17 SAFETY FEATURE, THESE CELLS COULD BE EMBEDDED INTO A  
18 MATRIX SO THEY COULD BE REMOVED IF THERE'S A PROBLEM  
19 IN TERMS OF SAFETY ISSUES. AND SO A PROGRAM IS  
20 OBVIOUSLY BEING CONSTRUCTED TO MOVE AHEAD FOR A  
21 CLINICAL TRIAL THAT IS, I THINK, FORWARD-LOOKING,  
22 THAT IS CAUTIOUS, AND THAT HAS THE POTENTIAL OF  
23 ACTUALLY HELPING PATIENTS. AND THERE ARE OTHERS  
24 LIKE THIS. IN FACT, THERE ARE MANY MORE THAT I'M  
25 PROBABLY NOT EVEN AWARE OF IN CALIFORNIA THAT WILL

## BARRISTERS' REPORTING SERVICE

1 EMERGE AS A RESULT OF THE RFA THAT'S ALREADY BEEN  
2 ISSUED.

3 BUT I JUST THINK WE HAVE TO BE CAREFUL  
4 THAT, FIRST, THAT WE DON'T RUSH TOO MANY OF THESE  
5 TREATMENTS INTO THE CLINIC BEFORE WE REALLY  
6 UNDERSTAND EXACTLY WHAT WE'RE DOING. AND, SECONDLY,  
7 I THINK WE NEED MORE THAN THAT, TO PLAN THESE  
8 EXPERIMENTS CAREFULLY ENOUGH, BECAUSE THEY REALLY  
9 ARE EXPERIMENTS, SO THAT WE CAN LEARN FROM THEM.  
10 AND WE SHOULD BE PREPARED THAT SOME OF THEM WILL  
11 LEAD TO ADVERSE EVENTS ALMOST CERTAINLY, AND THE  
12 FIELD NEEDS TO REALIZE THAT THAT'S GOING TO HAVE THE  
13 POTENTIAL OF SLOWING THINGS DOWN.

14 SO I JUST HOPE THAT WHILE WE HAVE THE  
15 DISCUSSION NOW FOR THE GOALS OF THE STRATEGIC PLAN  
16 FOR THE DURATION OF THE CIRM THAT AT LEAST SOME OF  
17 THESE ISSUES ARE KEPT IN MIND. AND MOSTLY AS AN  
18 ACADEMIC, I WANT TO MENTION THAT I THINK THE  
19 FOUNDATIONS OF STEM CELL BIOLOGY REALLY ARE  
20 IMPORTANT AND SHOULDN'T BE OVERLOOKED IN, FOR  
21 EXAMPLE, A RUSH TO PUSH THINGS INTO THE CLINIC.

22 AS A PHYSICIAN I UNDERSTAND WHY IT'S SO  
23 IMPORTANT TO DO THIS QUICKLY; THAT IS, TO TRY TO  
24 TREAT DISEASES AS SOON AS WE HAVE THE ABILITY TO DO  
25 THAT, AND IN SOME AREAS THAT'S FINE. I JUST THINK

## BARRISTERS' REPORTING SERVICE

1 WE SHOULD BE A LITTLE BIT CAUTIOUS, AND THAT WOULD  
2 BE MY MESSAGE THIS AFTERNOON. THANKS FOR THE  
3 OPPORTUNITY, ALAN.

4 MR. SHEEHY: SO THANK YOU, DR. KRIEGSTEIN.  
5 I THINK YOUR WORDS OF CAUTION ARE ALWAYS GOOD TO  
6 HEAR. EVEN THOUGH AS A PATIENT ADVOCATE, IT'S NOT  
7 THE BEST NEWS, BUT I PERSONALLY HAVE ATTENDED EVERY  
8 GRANT REVIEW THAT HAS TAKEN PLACE SINCE THE AGENCY  
9 WAS STARTED, AND I'M TREMENDOUSLY IMPRESSED BY THE  
10 PROGRESS WE'VE MADE. I KNOW FOR SOME PATIENT  
11 ADVOCATES, THEY'D LIKE US TO BE PUTTING STUFF IN  
12 PEOPLE RIGHT NOW. AND I THINK TO BE CAUTIOUS AND TO  
13 REALLY UNDERSTAND WHAT WE'RE DOING AND TO REALLY  
14 LEARN SOMETHING FROM THE EXPERIMENTS THAT WE'RE  
15 DOING IS CRITICALLY IMPORTANT.

16 I ALWAYS THINK THAT THE DEADLIEST THING A  
17 REVIEWER CAN SAY IS THAT WHETHER THE EXPERIMENT  
18 WORKS OR NOT, WE WON'T BE ABLE TO TELL. WE WON'T  
19 REALLY LEARN ANYTHING DEFINITELY FROM THIS  
20 EXPERIMENT EVEN THOUGH IT'S AN INTERESTING IDEA.

21 SO WHAT I'D LIKE TO DO NOW IS START TAKING  
22 PUBLIC COMMENTS OR QUESTIONS. DR. CSETE IS HERE.  
23 ALAN IS HERE. ANY KIND OF INPUT THAT YOU WOULD LIKE  
24 TO BE MADE INTO THE STRATEGIC PLAN AS WE MOVE  
25 FORWARD IN TRYING DEVELOP THIS INTERIM KIND OF

## BARRISTERS' REPORTING SERVICE

1 UPDATE, THAT'S NOT TRULY A NEW STRATEGIC PLAN, BUT  
2 JUST AN UPDATE TO KIND OF GET US THROUGH THE NEXT  
3 COUPLE OF YEARS.

4 SO I THINK THERE'S A MIC HERE. MAYBE AMY  
5 OR PAT COULD MAYBE TAKE THE MIC AROUND. SO IF  
6 SOMEBODY WANTS TO RAISE THEIR HAND.

7 DR. LUBIN: BURT LUBIN. I'M AT CHILDREN'S  
8 HOSPITAL IN OAKLAND. I DIRECT THE RESEARCH PROGRAM.  
9 AND WE DO MOSTLY STEM CELL WORK RELATED TO ADULT  
10 STEM CELLS FROM THE CORD BLOOD AND NOW FROM PLACENTA  
11 AND THE AMNION IN COLLABORATION WITH OUR COLLEAGUES  
12 IN VICTORIA.

13 WHAT I WANTED TO COMMENT ON WAS -- SO I'M  
14 A PEDIATRIC HEMATOLOGIST. I WORK AT CHILDREN'S  
15 HOSPITAL IN OAKLAND AND DIRECT THE RESEARCH PROGRAM.  
16 AND I'M INVOLVED IN CORD BLOOD-RELATED TRANSPLANT  
17 RESEARCH AND PLACENTAL CELL RESEARCH. SO I  
18 APPRECIATED THE COMMENTS THAT WERE MADE, BUT NOTHING  
19 WAS STATED ABOUT HOW WE GOT THE MONEY AND HOW THE  
20 PEOPLE IN THE STATE OF CALIFORNIA VOTED FOR CIRM  
21 FUNDS RELATED TO A HOPE OF CURE. AND I THINK  
22 WHATEVER -- THIS IS NOT TO SAY THAT I DISAGREE WITH  
23 THE CAUTION THAT NEEDS TO BE TAKEN, BUT I ALSO THINK  
24 THAT IT'S IMPORTANT FOR US TO RECOGNIZE, GIVEN THE  
25 POLITICAL CLIMATE AND THE ECONOMIC CLIMATE, WHAT THE

## BARRISTERS' REPORTING SERVICE

1 MISSION WAS PROPOSED THAT PEOPLE VOTED FOR IN ORDER  
2 TO GET THE FUNDS THAT WE HAVE. I DON'T THINK THERE  
3 NEEDS TO BE A DISCUSSION ABOUT THAT, BUT JUST A  
4 THOUGHT ABOUT IT.

5 THE THING THAT I DID WANT TO COMMENT ON IS  
6 COMPARING US TO NIH WHERE I'VE BEEN A REVIEWER FOR  
7 MANY YEARS, AS DR. KRIEGSTEIN AND OTHERS IN THIS  
8 ROOM, PROPOSING CLINICAL TRIALS AND GETTING SUPPORT  
9 FOR CLINICAL TRIALS HAS BEEN AN ENORMOUS PROBLEM.  
10 AND MOST OF THE FUNDING HAS GONE IN THE NIH TO  
11 NONCLINICAL TRIALS BECAUSE THEY'RE EXPENSIVE AND  
12 BECAUSE OF A NUMBER OF THINGS THAT WERE POINTED OUT  
13 ON THIS SLIDE. SO I THINK THE CHALLENGE OF HOW YOU  
14 EMBARK UPON A CLINICAL TRIAL AND HOW YOU DETERMINE  
15 EFFICACY, THERE ARE PEOPLE WHO DO JUST CLINICAL  
16 TRIAL EVALUATIONS WHO WOULD BE GOOD TO ADVISE CIRM  
17 AS TO SOME OF THE ISSUES THAT WERE PRESENTED ON  
18 THOSE SLIDES THAT WE MIGHT WANT TO CONSIDER AS WE  
19 MOVE FORWARD TO CLINICAL TRIALS BECAUSE THERE ARE  
20 WAYS TO ANSWER SOME OF THOSE QUESTIONS. IT JUST  
21 REQUIRES MONEY AND A LOT OF MONEY. AND I'M SURE  
22 WE'RE GOING TO BE DISCUSSING TODAY WHERE WE STAND  
23 ECONOMICALLY GIVEN PRESIDENT OBAMA'S SIGNATURE  
24 COUPLE DAYS AGO AND GIVEN THE STATE OF CALIFORNIA'S  
25 BUDGET.

## BARRISTERS' REPORTING SERVICE

1 SO I JUST THOUGHT THAT IT'S IMPORTANT TO  
2 LAY THESE ISSUES OUT. IT'S NOT REALLY A QUESTION.  
3 IT'S A CONCERN.

4 MR. SHEEHY: I DON'T KNOW IF DR. CSETE. I  
5 WANT TO ADDRESS PART OF THAT BECAUSE I KNOW THAT WE  
6 ARE ACTIVELY IN THE PLANNING STAGE.

7 DR. CSETE: I THINK I KNOW EVERYBODY IN  
8 THE ROOM JUST ABOUT, BUT JUST IN CASE, I'M MARIE  
9 CSETE. I'M THE CHIEF SCIENTIFIC OFFICER OF CIRM.  
10 AND I THINK BOTH OF YOU HAVE SAID RELATED THINGS.

11 SO FIRST, SAFETY IS, OF COURSE, OUR FIRST  
12 CONSIDERATION HERE. AND, AS YOU KNOW, YOU SAW AN  
13 INTERNAL DOCUMENT THAT I WROTE ABOUT THE WIDE RANGE  
14 OF SAFETY CONSIDERATIONS THAT WE HAVE TO CONSIDER AS  
15 WE GO FORWARD. NO ONE WANTS ANOTHER NAME LIKE JESSE  
16 GELSINGER IN THIS FIELD. AND I'M ALSO A PRACTICING  
17 PHYSICIAN AND FEEL THE CONTRARY PULLS BETWEEN THE  
18 PATIENTS PUSHING US TO GO GO GO FOR SOMETHING THAT  
19 THEY HAVE NO GOOD OPTIONS FOR AND THE HEALTH OF THE  
20 FIELD IN GENERAL AND THE WAY WE MAKE DECISIONS.

21 SO I JUST WANT TO ASSURE YOU THAT WE'RE  
22 GOING ABOVE AND BEYOND WHAT IS REQUIRED OF US IN  
23 TERMS OF THE KINDS OF MONITORING THAT WE WILL HAVE  
24 IN PLACE FOR DISEASE TEAMS. AND I THINK IF YOU READ  
25 THE DISEASE TEAMS VERY CAREFULLY, THE WAY SAFETY IS

## BARRISTERS' REPORTING SERVICE

1     CONSIDERED AS PART OF THAT RUN-UP TO THE CLINIC IS  
2     GOING TO BE AN IMPORTANT PART OF HOW THE GRANTS ARE  
3     REVIEWED.

4             SO THE LAST THING THAT -- AND WE ALSO  
5     THINK THAT IT'S NOT THE SIGNATURE SO MUCH, BURT, ON  
6     THAT PIECE OF PAPER, BUT A SENSE THAT CIRM WILL NOW  
7     BE ABLE TO GET ACCESS TO AN ONGOING CONTACT WITH THE  
8     PEOPLE AT THE FEDERAL LEVEL WHO ARE INVESTED IN AND  
9     EXPERT IN CLINICAL TRIALS. UP UNTIL NOW WE'VE HAD A  
10    BIT OF A COLD SHOULDER FROM BOTH THE FDA AND WE HAD  
11    NO OFFICIAL MECHANISM FOR WHICH WE COULD BE TALKING  
12    TO NIH ABOUT HOW TO SYNERGIZE THESE EFFORTS AND NOT  
13    OVERLAP AND MAKE SURE THAT CLINICAL TRIALS HAPPEN IN  
14    A REASONABLE TIME WHERE APPROPRIATE.

15            SO THE CHANGE OF ADMINISTRATION HAS MEANT  
16    THAT WE CAN PICK UP THE PHONE AND START GETTING  
17    THOSE THINGS IN PLACE. AND WE HAVE SPENT ENORMOUS  
18    EFFORT TRYING TO DO THAT. SO ANY OTHER CONTACTS  
19    THAT WE DON'T KNOW ABOUT THAT WOULD BE WILLING TO  
20    WORK WITH US IN THESE AREAS I'D BE HAPPY TO HEAR  
21    ABOUT.

22            WAS THERE ANOTHER PART OF YOUR --

23            MR. BROWN: MY NAME IS DAVIS BROWN. IN A  
24    SENSE, I GUESS, I REPRESENT THE PARKINSON'S  
25    COMMUNITY OF THE NORTH BAY. WE HAVE A NEW

## BARRISTERS' REPORTING SERVICE

1 FOUNDATION IN PROGRESS OF DEVELOPMENT FOR PATIENT  
2 CARE INITIATIVES. WE ARE CONCERNED IN THE  
3 PARKINSON'S COMMUNITY THAT TOO MUCH -- I SHOULDN'T  
4 SAY IT THAT WAY. LET ME REPHRASE IT -- THAT A GREAT  
5 DEAL OF ATTENTION IS BEING PUT ONTO RESEARCH, BASIC  
6 RESEARCH AND APPLIED RESEARCH, AND WE HOPE TOWARD  
7 ARRIVING AT A CURE THROUGH STEM CELLS AND/OR OTHER  
8 MEANS, BUT IN THE MEANTIME WE'RE ALSO CONCERNED  
9 ABOUT THE CARE FOR THE PATIENTS THAT ARE SUFFERING  
10 RIGHT NOW.

11 I HAVE A COLLEAGUE FROM OUR SUPPORT GROUP  
12 IN SANTA ROSA WHO IS NOW IN THE HOSPITAL FOR THE  
13 LAST WEEK WRITHING IN PAIN AND TRYING TO ADJUST  
14 MEDICATIONS AND NOT GETTING TOO FAR WITH IT. AND HE  
15 AND OTHERS WOULD WISH FOR THE CHANCE TO PARTICIPATE  
16 IN CLINICAL TRIALS. I THINK THAT ONE OF THE  
17 PROBLEMS IS THAT CLINICAL TRIALS ARE NOT AS WELL  
18 ADVERTISED AS THEY NEED TO BE THROUGH THE PATIENT  
19 COMMUNITIES. I DON'T KNOW SPECIFICALLY HOW TO  
20 RECOMMEND BETTER WAYS, BUT THERE MUST BE BETTER WAYS  
21 BECAUSE WE VERY SELDOM HEAR IN ANY ROUTINE OR  
22 ONGOING FASHION ABOUT CLINICAL TRIALS BEING HELD.  
23 IT'S SORT OF CATCH AS CATCH CAN, AND I THINK THAT  
24 THAT NEEDS TO BE CONSIDERED AS YOU MOVE TOWARD  
25 CLINICAL TRIALS.

## BARRISTERS' REPORTING SERVICE

1 WE ARE LOOKING FORWARD TO WORKING WITH THE  
2 BUCK INSTITUTE, WHICH IS UP OUR WAY, AND OTHERS WHO  
3 ARE INVOLVED IN THE STEM CELL RESEARCH PROGRAM, AND  
4 WE HAVE GREAT HOPES FOR IT. OUR PARKINSON'S  
5 ADVOCATE, JOAN SAMUELSON, I KNOW HAS BEEN VERY  
6 ACTIVE ON YOUR BOARD. AND WE ARE AVAILABLE AND WE  
7 ARE INTERESTED AND WE'D LIKE TO KNOW WHAT WE CAN  
8 CONTRIBUTE TO HELP AND PARTICIPATE IN THE ONGOING  
9 PROCESS.

10 DR. CSETE: I REALLY APPRECIATE THOSE  
11 COMMENTS. SO, FIRST, I HOPE, IF YOU ARE NOT AWARE  
12 OF WHAT SOUNDS LIKE A VERY SIMILAR GROUP THAT'S  
13 FORMED FOR PATIENT CARE ISSUES AROUND PARKINSON'S IN  
14 SOUTHERN CALIFORNIA. I CAN PUT YOU IN TOUCH WITH  
15 THAT GROUP. I THINK THEY'VE DONE SOME VERY  
16 WORTHWHILE THINGS. JIM HUANG, WHO I MET AT A BOARD  
17 MEETING IS THE PERSON WHO, AS A PATIENT ADVOCATE,  
18 STARTED THAT GROUP. AND I THINK IT'S REALLY  
19 IMPORTANT FOR US TO KEEP CONTACT WITH THE PATIENT  
20 ADVOCATES AT CIRM, AND I WOULD WELCOME YOU TO COME  
21 IN AND JUST SIT WITH ME FOR A BIT BECAUSE I THINK  
22 IT'S GREAT. WE CAN'T DO PATIENT CARE. THAT'S  
23 NOT -- WE'RE NOT A HOSPITAL, AND IT'S NOT WHAT WE  
24 DO, BUT I THINK IT'S REALLY IMPORTANT FOR OUR  
25 PATIENT CARE -- PEOPLE INTERESTED IN PATIENT CARE

## BARRISTERS' REPORTING SERVICE

1 AND PATIENT ADVOCATES TO BE INVESTED IN THE RESEARCH  
2 COMMUNITY AND HAVE AN ONGOING JUST OPEN  
3 COMMUNICATION WITH IT. WE'VE BEEN VERY SUCCESSFUL  
4 IN DOING THAT WITH OTHER DISEASES.

5 IN TERMS OF CLINICAL TRIALS, THE ONES THAT  
6 REACH REGISTRATION AT THE NATIONAL LEVEL AND ARE  
7 APPROVED BY THE FDA ARE ALL EASILY ACCESSIBLE BY  
8 PERIODICALLY CHECKING ON CLINICALTRIALS.GOV. WHEN  
9 YOU GO TO THAT WEBSITE, YOU CAN TYPE IN THE DISEASE  
10 OF INTEREST AND THE CITY, AND YOU WILL THEN GET A  
11 READING OF ANYTHING THAT'S REGISTERED WHERE PATIENTS  
12 FROM YOUR GEOGRAPHIC AREA ARE ELIGIBLE, AND THE SITE  
13 WILL ALSO TELL YOU IF THEY'RE ENROLLING, IF  
14 ENROLLMENT IS CLOSED, WHAT THE SPECIFIC KINDS OF  
15 PATIENTS ARE THAT ARE ELIGIBLE.

16 WE GET REQUESTS ALL THE TIME ABOUT HEARING  
17 ABOUT CLINICAL TRIALS FROM VARIOUS PATIENT GROUPS,  
18 AND WE DO HEAR ABOUT SOME CREDIBLE ONES IN EUROPE.  
19 WE'RE HAPPY TO SHARE THAT INFORMATION WHEN WE HAVE  
20 IT, BUT WE ALWAYS REFER PEOPLE BACK TO THE CLINICAL  
21 TRIALS WEBSITE.

22 MR. BROWN: IF I COULD COMMENT ON THAT, I  
23 THINK THAT ONE OF THE PROBLEMS IS, AS WAS POINTED  
24 OUT HERE BY ONE OF THE PRESENTERS, TECHNOLOGY IS  
25 GETTING AHEAD OF UNDERSTANDING. AND THE TECHNOLOGY

## BARRISTERS' REPORTING SERVICE

1 OF THE WEB AND THE INFORMATION CAPABILITIES THAT IT  
2 HAS FOR PROVIDING ARE NOT AS WELL ABSORBED BY THE  
3 OLDER GENERATION THAT'S SUFFERING FROM THE DISEASES  
4 AS THE YOUNGER GENERATION WOULD LIKE TO EXPECT THAT  
5 THEY ARE. AND, THEREFORE, THEY DON'T JUMP TO THE  
6 COMPUTER EVERY HOUR ON THE HOUR TO CHECK THEIR  
7 E-MAIL AND SO FORTH AND SO ON, AND THAT INCLUDES ME.  
8 ALTHOUGH I UNDERSTAND THE TECHNOLOGY AND I USE IT  
9 WHEN I CAN, I'M NOT A COMPUTER FREAK AND I DON'T GET  
10 INVOLVED IN THESE THINGS. BUT WE NEED SOMEBODY WHO  
11 DOES, BUT WE NEED TRAINING FOR THOSE PEOPLE TOO.

12 DR. CSETE: I THINK IT'S ALSO INCUMBENT ON  
13 YOU TO JUST REMIND YOUR PHYSICIANS PERIODICALLY TO  
14 CHECK THAT WEBSITE IF THEY'RE NOT GETTING REGULAR  
15 UPDATES.

16 MR. BROWN: BUT THE QUESTION IS, YOU KNOW,  
17 IS THAT REALLY THE END ALL OF IT, OR SHOULD WE BE  
18 LOOKING AT ANOTHER PROCESS THAT INCORPORATES THAT,  
19 THAT TRAINS PEOPLE TO BE THE INFORMATION FLOW  
20 PEOPLE, IF YOU WILL, AND THAT GET -- THAT ACT AS AN  
21 INTERMEDIARY TO HELP DISPERSE THIS INFORMATION OUT  
22 TO THE BROADER AUDIENCE OF PATIENTS THAT ARE EITHER  
23 INCAPABLE OR NOT AVAILABLE OR DON'T HAVE THE  
24 FACILITIES AVAILABLE TO GET INTO THE WEBSITES AND DO  
25 THEIR OWN RESEARCH AT A LOCAL LEVEL. I THINK THAT'S

## BARRISTERS' REPORTING SERVICE

1 A REALLY IMPORTANT POINT THAT NEEDS TO BE CONSIDERED  
2 AS WE WHO ARE SMARTER ABOUT THESE THINGS, IF YOU  
3 WILL, RACE THROUGH THE PROCESS. I THINK YOU'RE  
4 MISSING SOME OF THE PEOPLE THAT YOU ARE TRYING TO  
5 HELP. DOES THAT MAKE SENSE?

6 DR. CSETE: YEAH. WE HAVE A  
7 COMMUNICATIONS OFFICE. AND, AGAIN, WE DON'T HAVE A  
8 PROCESS TO PICK UP THE PHONE AND CALL PEOPLE, BUT WE  
9 DO HAVE PRESS RELEASES AND WE DO HAVE BLAST  
10 E-MAILS -- AGAIN, IT'S TECHNOLOGY -- E-MAIL MAILINGS  
11 TO ANYONE WHO'S INTERESTED IN HEARING OF UPDATES.  
12 I'M QUITE CERTAIN THAT WE WOULD MAKE LOCAL  
13 ANNOUNCEMENTS IF WE WERE FORTUNATE ENOUGH TO REACH A  
14 CLINICAL TRIAL THAT WAS FUNDED BY CIRM.

15 I THINK THIS IS SOMETHING THAT OUR CLEVER  
16 COMMUNICATIONS PEOPLE CAN CHEW ON, AND IT'S A VERY  
17 GOOD SUGGESTION.

18 MR. BROWN: IF I MAY, IN PASSING THE MIC  
19 BACK, I WOULD LIKE TO JUST SAY THAT SINCE THE VERY  
20 EARLY START-UP OF CIRM WHEN I ATTENDED SOME OF YOUR  
21 MEETINGS OVER IN SACRAMENTO, I'D LIKE TO COMPLIMENT  
22 YOU ON THE PROGRESS YOU'VE MADE IN SPITE OF GREAT  
23 ODDS FROM THE WASHINGTON, D.C. LEVEL. I'M GOING  
24 BACK TO D.C. FOR THE PARKINSON'S ACTION NETWORK  
25 FORUM NEXT WEEK, AND I LOOK FORWARD TO SEEING HOW

## BARRISTERS' REPORTING SERVICE

1 THE SYSTEM IS CHANGING BACK THERE. AND I JUST WANT  
2 TO THANK YOU VERY, VERY MUCH FOR ALL THAT YOU ALL  
3 ARE DOING HERE. I THINK YOU'VE GOTTEN A GREAT LEAD  
4 OVER SOME OTHER PARTS OF THE COUNTRY, AND WE JUST  
5 HOPE THAT YOU'LL CONTINUE THAT ALONG AND INCORPORATE  
6 US INTO YOUR THINKING IN ANY WAY POSSIBLE.

7 MR. SHEEHY: IF I CAN JUST ADD SOMETHING,  
8 I THINK BRUCE HAS HIS HAND UP. JOAN, I THINK ONE OF  
9 THE BEST THINGS ABOUT THIS EXPERIENCE BEING ON THE  
10 BOARD IS GETTING TO BE FRIENDS WITH PEOPLE LIKE  
11 JOAN. US ADVOCATES TEND TO BE IN OUR SILOS. WE ALL  
12 HAVE OUR PARTICULAR DISEASES. AND BEING ABLE TO  
13 HAVE A BROADER SENSE OF WHAT OTHER CHALLENGES ARE  
14 FOR OTHER PEOPLE WHO HAVE OTHER DISEASES HAS BEEN  
15 REALLY AN AMAZING EXPERIENCE. SO JOAN HAS BECOME A  
16 DEAR FRIEND OF MINE.

17 I WOULD LIKE TO SAY WE HAVE BEEN  
18 DISCUSSING, AT LEAST SOME OF BOARD MEMBERS, EXACTLY  
19 WHAT YOU'RE TALKING ABOUT. AND THE REASON IS  
20 BECAUSE IF WE CAN GET ROBUST PARTICIPATION BY THE  
21 ADVOCACY GROUPS, BY PATIENTS, AS WE START TO GO INTO  
22 CLINICAL TRIALS, WE CAN START TO CHANGE THE  
23 RISK-REWARD RATIO AT THE FDA. WE'VE SEEN THIS IN  
24 HIV. MY DEAR FRIEND JEFF GETTY, WHO GOT THE BABOON  
25 MARROW TRANSPLANT, WHY WOULD YOU LET ANYBODY DO

## BARRISTERS' REPORTING SERVICE

1 THAT? WELL, HIS FAMILY CAME AND CRIED AT THE FDA  
2 HEARING. THEY'RE NOT WORRIED ABOUT GETTING SUED OR  
3 PEOPLE GETTING REALLY ANGRY WHEN THE FAMILY IS  
4 BEGGING YOU TO DO THIS EXPERIMENT.

5 AND INTERESTING ENOUGH, SOME OF THE BOARD  
6 MEMBERS WHO HAVE BEEN REALLY ENGAGED IN TRYING TO  
7 CARRY ON THESE DISCUSSIONS HAVE BEEN SOME FOLKS FROM  
8 INDUSTRY BECAUSE THEY RECOGNIZE TOO, AS THE PEOPLE  
9 WHO ARE GOING TO BE TAKING SOME OF THESE THINGS INTO  
10 CLINICAL TRIALS, THAT IF YOU HAVE THIS TIGHT  
11 RELATIONSHIP WITH THE ADVOCACY COMMUNITY, IT WILL BE  
12 EASIER TO GO FORWARD. YOU'LL GET -- EASY TO RECRUIT  
13 PATIENTS, THE WHOLE THING CAN KIND OF WORK BETTER.

14 SO I THINK PART OF IT IS WE'RE NOT --  
15 WE'RE STILL FEELING AS AN AGENCY HOW WE'RE GOING TO  
16 WORK INTO THE CLINICAL TRIAL FIELD. I THINK AS  
17 WE'VE HEARD FROM DR. KRIEGSTEIN, THE FIELD IS NOT --  
18 WE'RE STILL KIND OF TENTATIVELY HEADED THAT  
19 DIRECTION, BUT WHAT YOU ARE TALKING ABOUT IN TERMS  
20 OF HAVING THE ADVOCACY COMMUNITY INTIMATELY INVOLVED  
21 IN THIS, WELL-INFORMED, AVAILABLE TO PARTICIPATE, I  
22 THINK THAT FOR THE PATIENT ADVOCATE BOARD MEMBERS OF  
23 THE CIRM, WE'RE ACTIVELY THINKING ABOUT THAT, AND WE  
24 REALLY WANT TO SEE THAT HAPPEN.

25 DR. CONKLIN: FIRST, I JUST WANTED TO

## BARRISTERS' REPORTING SERVICE

1 ACTUALLY ADD THAT IT'S ACTUALLY INSPIRATIONAL TO  
2 HAVE THE PATIENT GROUPS INVOLVED. I THINK THAT  
3 THAT'S SOMETHING THAT'S VERY DIFFERENT THAN THE NIH  
4 IN THE SENSE THAT WE'RE NOT ATTACHED TO THE PATIENT  
5 GROUPS VIA NIH THE WAY WE ARE WITH CIRM. I THINK  
6 THAT THAT'S REALLY BEEN INSPIRATIONAL.

7 THE SECOND THING, JUST COMPARING CIRM TO  
8 NIH, IT'S REALLY THE TRANSPARENCY OF THE REVIEW  
9 PROCESS IS REALLY ADMIRABLE, I THINK, AND SOMETHING  
10 WHICH A LOT OF PEOPLE DIDN'T THINK WOULD WORK. BUT  
11 BEING ABLE TO HAVE YOUR OWN -- REVIEWS OF YOUR  
12 GRANTS POSTED ON THE INTERNET WAS INITIALLY A SCARY  
13 PROCESS, BUT HAS ACTUALLY TURNED OUT TO BE A REALLY  
14 POSITIVE EXPERIENCE IN THE SENSE THAT YOU ACTUALLY  
15 END UP CREATING COLLABORATIONS AND THINGS LIKE THAT  
16 BY READING OTHER PEOPLE'S REVIEWS AND SAYING YOU'RE  
17 DOING THIS TOGETHER. WE SHOULD WORK TOGETHER, ETC.

18 THE POINT -- THE QUESTION THAT I HAD,  
19 THOUGH, AFTER THOSE TWO COMMENTS IS THAT INITIALLY  
20 THERE WAS A REALLY LASER-LIKE FOCUS ON EMBRYONIC  
21 STEM CELLS, SOMETHING FROM EMBRYONIC STEM TISSUE.  
22 THEN THERE WAS THE IPS REALLY WONDROUS DISCOVERY  
23 THAT I THINK -- AND VERY WISELY, I THINK CIRM OPENED  
24 THE DOOR A BIT TO WORKING WITH IPS CELLS. AND I  
25 THINK THAT THAT'S BEEN -- I THINK IT'S A WISE THING

## BARRISTERS' REPORTING SERVICE

1 BECAUSE FUNCTIONALLY THEY'RE PLURIPOTENT AND SO ON.

2 THE QUESTION I HAVE IS JUST IS IT OPENING  
3 AGAIN TO NOW A BROADER THING FOR MESENCHYMAL STEM  
4 CELLS, OR IS IT GOING TO STAY FOCUSED ON SOMETHING  
5 THAT STARTS WITH PLURIPOTENT STEM CELLS BECAUSE IT  
6 DOES AFFECT HOW WE PUT TOGETHER GRANTS AND THINGS  
7 LIKE THAT? AND IT'S NOT A HUNDRED PERCENT CLEAR AT  
8 LEAST TO ME.

9 DR. CSETE: WE'RE DEFINITELY OPENING  
10 FOCUS. SO THERE'S, AGAIN, A BALANCE HERE. FIRST  
11 AND FOREMOST, WE WANT TO GET TO THE END GAME, WHICH  
12 IS CURES. WHATEVER TOOL GETS YOU THERE BEST, AS  
13 LONG AS IT'S BASED SOMEHOW IN STEM CELL BIOLOGY, I  
14 THINK IS WELL WITHIN THE FRAME OF OUR MISSION. AND  
15 YOU WILL NOTICE THAT I THINK WE'VE REALLY EMBRACED  
16 IPS, NOT SO MUCH THINKING THAT THAT'S GOING TO BE  
17 THE FIRST CELL INTO A PLURIPOTENT CELL THERAPY, BUT  
18 BECAUSE THE POTENTIAL FOR REALLY BEAUTIFUL DISEASE  
19 MODELS IN A DISH THAT CAN BE USED FOR HIGH  
20 THROUGHPUT SCREENING AND DEVELOPMENT OF DRUG  
21 THERAPIES, THAT'S ALL PART OF DISEASE TEAMS AND  
22 CERTAINLY IT'S OUR VISION FOR THIS PIPELINE. SO  
23 THAT REALLY OPENED THE SPECTRUM OF HOW STEM CELL  
24 BIOLOGY COULD HAVE A REACH INTO DISEASES WHERE WE  
25 REALLY DIDN'T HAVE A REACH BEFORE.

## BARRISTERS' REPORTING SERVICE

1                   AND AS YOU WELL KNOW, WE ALSO FELT VERY  
2                   STRONGLY THAT FOR NEW FACULTY, WHICH WAS A VERY  
3                   LARGE INVESTMENT IN THE FUTURE OF CALIFORNIA  
4                   SCIENCE, WE DIDN'T WANT THEM TO NECESSARILY HAVE TO  
5                   WAIT. WE WANTED THEIR GOOD DEVELOPMENTAL BIOLOGY  
6                   AND ADULT STEM CELL WORK TO BE RIGHT OFF THE GROUND  
7                   SO THAT THEY COULD MAKE HEADWAY. AND A GOOD  
8                   PERCENTAGE OF THE NEW FACULTY AWARDS ARE FOR ADULT  
9                   STEM CELL WORK THAT WE THINK ARE WORKING THEIR WAY  
10                  TOWARDS THE CLINIC. SO ABSOLUTELY WE'VE OPENED THE  
11                  DOOR.

12                 ONE OF THE THINGS, I THINK, THAT WE HAVE  
13                 TO BE REALLY CONSCIOUS OF WAS THE SENSE THAT WHEN  
14                 CALIFORNIA VOTED FOR CIRM, THEY VOTED FOR IT AS A  
15                 CALIFORNIA SPECIAL THING. AND SO AS PART OF OUR  
16                 REVIEW PROCESSES, WE CONTINUE TO HAVE A METRIC FOR  
17                 THE REVIEWERS, ONE OF THE CRITERIA BEING COULD THIS  
18                 BE FUNDED BY OTHER MECHANISMS? NOW, WHAT'S  
19                 HAPPENING AT NIH SUGGESTS THAT SOME OF THE BASIC  
20                 SCIENCE COULD WELL BE FUNDED BY OTHER MECHANISMS;  
21                 BUT JUST BECAUSE OF THE SCALE OF SOME OF THE GRANTS  
22                 THAT WE'RE NOW PROPOSING AND A LITTLE BIT BECAUSE  
23                 SOME OF THEM ARE STILL MORE IDEA-BASED THAN  
24                 PRELIMINARY DATABASED, WE WILL STILL HAVE A BODY OF  
25                 GRANTS THAT -- APPLICATIONS THAT BECAUSE OF THE

## BARRISTERS' REPORTING SERVICE

1 NATURE OF THE RESEARCH OR THE SCALE OF THE RESEARCH  
2 COULD NOT BE FUNDED BY ANY OTHER MECHANISM,  
3 PARTICULARLY WHEN WE HAVE ALL THESE PARTNERS NOW  
4 INVOLVED.

5 SO THAT'S THE TENSION THAT WE HAVE TO WORK  
6 WITH, BUT WE CERTAINLY HAVE OPENED UP THE DOORS TO  
7 THE BEST POSSIBLE STEM CELL-BASED RESEARCH THAT CAN  
8 LEAD TO CURES.

9 MR. SHEEHY: COULD I ASK DR. CONKLIN WHAT  
10 HIS FEELING IS BECAUSE I THINK THIS IS AN  
11 INTERESTING KIND OF QUESTION IF PEOPLE HAVE  
12 THOUGHTS. BECAUSE I KNOW FROM SITTING IN THE  
13 REVIEWS, THERE WAS A POSITIVE BIAS AGAINST ANYTHING  
14 THAT WASN'T ES CELLS. WHY NOT? WE WERE THE ONLY  
15 PEOPLE WHO COULD DO THIS. WE HAD REVIEWERS COMING  
16 FROM AROUND THE COUNTRY, AND THEY WERE REALLY  
17 ENERGIZED BY THE TYPES OF EXPERIMENTS THAT PEOPLE IN  
18 THIS ROOM WERE DOING AND WANTED TO SEE THAT GO  
19 FORWARD, AND ADULT STEM CELLS OR SOMETHING THAT  
20 MIGHT GO TO THE NIH WAS JUST NOT THAT FUN.

21 BUT NOW THAT THE NIH CAN FUND A LOT OF  
22 THIS, WHAT SHOULD WE DO? I THINK THIS IS A REALLY  
23 INTERESTING QUESTION FOR US. SHOULD WE -- IF YOU'RE  
24 LOOKING DOWN THE DEVELOPMENTAL PIPELINE, IF WE DO  
25 MORE ADULT STUFF, WE CAN DO MORE STUFF CLOSER TO THE

## BARRISTERS' REPORTING SERVICE

1 CLINIC.

2 DR. CONKLIN: JUST I HAVE TWO COMMENTS ON  
3 THAT, I THINK. ONE IS THAT IT'S VERY DIFFICULT  
4 TO -- IT'S RELATIVELY EASY TO DEFINE WHAT A  
5 PLURIPOTENT STEM CELL IS. WHAT AN ADULT STEM CELL  
6 IS IS DIFFICULT TO DEFINE. SO WHEN YOU -- ONCE YOU  
7 OPEN THE DOOR TO THAT, IT'S VERY BROAD IN TERMS OF  
8 WHAT IT IS. AND SO THERE WILL BE A DILUTIONAL  
9 EFFECT. THE ADVANTAGES, OF COURSE, THAT YOU CAN --  
10 YOU HAVE A MUCH BIGGER PLAYING FIELD. THE  
11 DISADVANTAGE IS THAT THE ADULT STEM CELLS ARE REALLY  
12 NOW COMMITTED TO A SPECIFIC DISEASE; WHEREAS,  
13 DISCOVERIES MADE IN PLURIPOTENT STEM CELLS HAVE A  
14 CROSSOVER SECONDARY GAIN.

15 FOR INSTANCE, MY WORK IS PRIMARILY ON  
16 CARDIAC; BUT BECAUSE WE'RE WORKING ON PLURIPOTENT  
17 STEM CELLS AND WE'RE FOCUSING ON THAT, WE MAY HAVE A  
18 DISCOVERY WHERE, FOR INSTANCE, OUR FAILED EXPERIMENT  
19 IS THAT ALL WE MAKE IS DOPAMINERGIC NEURONS, AND  
20 THAT COULD BE SEEN AS A SUCCESS FOR MY PATIENT  
21 ADVOCATE IN FRONT OF ME HERE; WHEREAS, THAT'S  
22 UNLIKELY TO HAPPEN WORKING WITH, SAY, SKIN CELLS  
23 THAT ARE ESSENTIALLY COMMITTED IN THE SKIN CELL  
24 LINEAGE ESSENTIALLY. SO THERE'S A DILUTIONAL  
25 EFFECT, BUT THERE'S OBVIOUSLY ADVANTAGES. SO I SEE

## BARRISTERS' REPORTING SERVICE

1       ADVANTAGES ON BOTH SIDES.

2                       WHAT I DEFINITELY SEE, THOUGH, AS A MEMBER  
3       OF A DISEASE TEAM, FOR INSTANCE, IS AS WE MOVE  
4       FORWARD, HOW WE MAKE OUR PLANS MAY BE DIFFERENT IN  
5       TERMS OF WHAT WE PLACE IN, FOR INSTANCE, IN A  
6       DISEASE TEAM. WE'RE ACTIVELY DOING THAT CARDIAC,  
7       FOR INSTANCE, AND I THINK THAT THERE ARE OTHER  
8       GROUPS AS WELL MAKING SIMILAR SORTS OF DECISIONS.  
9       AND I THINK THAT IT'S IMPORTANT FOR US TO KNOW WHAT  
10      THE PLAYING FIELD IS ESSENTIALLY. AND TO BE HONEST  
11      WITH YOU, WHAT CELESTE JUST SAID WAS NEWS TO ME.  
12      I'M SORRY. MARIE.

13                   DR. CSETE: I WOULD ENCOURAGE YOU TO READ  
14      THE RFA'S VERY CAREFULLY BECAUSE WE DO SET THOSE  
15      PARAMETERS IN EACH ROUND. AND THOSE THINGS, THOSE  
16      PARAMETERS, COULD CHANGE WITH EACH ISSUING OF THESE  
17      CORE GRANTS. BUT RIGHT NOW FOR DISEASE TEAMS, THERE  
18      WILL BE GROUPS WORKING WITH PLURIPOTENT HUMAN  
19      EMBRYONIC STEM CELL-DERIVED CELL THERAPIES. WE  
20      ANTICIPATE NOVEL APPLICATIONS OF ADULT STEM CELLS.  
21      WE ANTICIPATE DRUG AND BIOLOGIC DEVELOPMENT AS PART  
22      OF IT, AND WE'RE LOOKING FOR THE BEST, MOST READY  
23      SCIENCE FOR WHICH THERE'S A HUGE UNMET MEDICAL NEED.  
24      SO I THINK WE'VE SET OUT THOSE CRITERIA. YEAH, IT'S  
25      BROAD. IT'S MUCH MORE OF A CHALLENGE FOR US BECAUSE

## BARRISTERS' REPORTING SERVICE

1 WE'LL BE COMPARING APPLES TO ORANGES.

2 BUT KEEPING THE EYE ON THE HORIZON,  
3 READINESS FOR A NEW THERAPY THAT REALLY  
4 FUNDAMENTALLY CHANGES THE WAY PATIENTS WITH A  
5 CERTAIN DISEASE CAN BE TREATED IS STILL FOREMOST IN  
6 OUR MIND. SO WHATEVER TOOL YOU USE, THAT'S OKAY  
7 WITH US. BUT WE'RE REALLY COUNTING ON THE  
8 SCIENTISTS TO GET US THERE.

9 DR. GREEN: MY NAME IS WARNER GREEN FROM  
10 THE GLADSTONE INSTITUTE. I WANTED TO GO BACK TO  
11 THIS ISSUE OF THE INTERPLAY NOW BETWEEN CIRM AND NIH  
12 SINCE NIH IS OPENING UP STEM CELL RESEARCH. I'D  
13 JUST LIKE TO MAKE THE POINT THAT I CERTAINLY HOPE  
14 THAT CIRM DOES NOT TURN OVER THE REINS OF BASIC  
15 SCIENCE TO THE NIH BECAUSE I'M NOT CERTAIN THAT WE  
16 CAN COUNT ON THE NIH IN TERMS OF PAYLINES AFTER THE  
17 STIMULUS PACKAGE. NO ONE KNOWS WHAT'S GOING TO  
18 HAPPEN.

19 AND I ALSO THINK THAT IT'S FOOLISH TO  
20 THINK THAT WE HAVE THE KNOWLEDGE NOW FOR THE DISEASE  
21 TEAMS TO SUCCEED. INDEED, I SUSPECT THAT YEARS OF  
22 BASIC SCIENCE ARE NEEDED TO REALLY SOLIDLY POSITION  
23 THE DISEASE TEAMS TO SUCCEED IN THE TASKS THAT THEY  
24 ARE ATTEMPTING. SO I THINK THAT WHILE THERE  
25 IS THIS -- I'M SURE THERE'S THIS URGENCY TO DELIVER

## BARRISTERS' REPORTING SERVICE

1 TO THE STATE OF CALIFORNIA, TO THE POPULATION THE  
2 MIRACLE STEM CELL THERAPY, I WOULD SUGGEST THAT  
3 WE'RE IN THIS FOR THE LONG RUN. THE TECHNOLOGY IS  
4 TREMENDOUSLY EXCITING, BUT WE CANNOT EITHER DELEGATE  
5 TO OTHERS OR FORFEIT THE INVESTMENT IN THE BASIC  
6 SCIENCE NEEDED TO ENSURE THE LONG-TERM SUCCESS OF  
7 THIS INITIATIVE.

8 DR. CSETE: WE DO THIS AT EVERY MEETING.  
9 IT SEEMS WE'RE REASSURING YOU THAT BASIC BIOLOGY,  
10 WE'RE NOT ABANDONING BASIC BIOLOGY. IT'S A PART OF  
11 THE CORE GRANTS. AND THE CORE GRANTS WERE DESIGNED  
12 TO COVER THE FULL PIPELINE.

13 WE DON'T KNOW WHAT OUR RELATIONSHIP WITH  
14 NIH IS GOING TO BE BECAUSE WE HAVEN'T REALLY  
15 ESTABLISHED IT YET. WE'RE JUST LOOKING FORWARD TO  
16 IT. BUT THE IDEA HERE WOULD BE THAT WE DO HAVE A  
17 SHORTER TERM HORIZON BECAUSE OF THE MANDATE OF THE  
18 WAY THE PROPOSITION IS WRITTEN. SO WE WILL BE  
19 LOOKING FOR THINGS THAT ARE READIER FOR CLINICAL  
20 THAN NOT, AND THE NIH TENDS TO FUND RESEARCH THAT  
21 HAS A LONGER TIME HORIZON. SO WE WANT TO MAKE SURE  
22 THAT OUR EFFORTS ARE SYNERGISTIC RATHER THAN  
23 OVERLAPPING, BUT THE MOST IMPORTANT THING IS THAT WE  
24 HOPE TO CAPITALIZE ON THE KIND OF BASIC RESEARCH  
25 RESULTS THAT ARE COMING BACK TO US.

## BARRISTERS' REPORTING SERVICE

1 I MEAN I HAD GREAT PLEASURE READING YOUR  
2 PROGRESS REPORT. IT WAS ONE OF THE MOST BEAUTIFUL  
3 THINGS I'D SEEN. THOSE ARE THE KINDS OF THINGS THAT  
4 WE'VE STARTED THAT WE REALLY HOPE TO CONTINUE WITH.

5 MR. SHEEHY: I DON'T THINK WE ACTUALLY  
6 PRESENTED WHAT THE CORE GRANTS WERE. IT MIGHT BE  
7 HELPFUL, AND THESE WILL REPEAT ROUGHLY ON AN ANNUAL  
8 12- TO 18-MONTH BASIS.

9 DR. CSETE: SO THE IDEA WITH THE CORE  
10 GRANTS WAS THAT BASIC BIOLOGY WOULD COVER THE  
11 DISCOVERY SCIENCE, THAT EARLY TRANSLATION WOULD WORK  
12 ON BOTTLENECKS TO TRANSLATION AS WELL AS DEVELOPMENT  
13 OF POTENTIAL CANDIDATES FOR THERAPIES, AND THEN THE  
14 DISEASE TEAMS WOULD GO FROM THE EARLY TRANSLATION  
15 MODE, MAKE A DECISION ABOUT WHETHER A CANDIDATE WAS  
16 READY FOR PRECLINICAL DEVELOPMENT AND THE INVESTMENT  
17 IN WORKING TOWARDS AN IND. SO BASICALLY THOSE THREE  
18 CORE GRANTS, BASIC BIOLOGY, EARLY TRANSLATION, AND  
19 DISEASE TEAMS, COVER THAT VALLEY OF DEATH THAT WE  
20 TALKED ABOUT -- THAT ALAN TALKED ABOUT.

21 AND SO THAT CALCULATION WAS MADE SO THAT  
22 WE ARE DOING THE KINDS OF SCIENCE NECESSARY TO MEET  
23 OUR MISSION, BUT ALSO TO MAKE THE CYCLIC APPEARANCE  
24 OF THE GRANTS SOMETHING THAT WAS MUCH MORE  
25 UNPREDICTABLE FOR THE SCIENTISTS UP UNTIL NOW. SO

## BARRISTERS' REPORTING SERVICE

1 WE'LL GET ON A MORE REGULAR SCHEDULE SO YOU KNOW  
2 WHEN THINGS ARE COMING OUT.

3 DR. BERNSTEIN: MY NAME IS HAROLD  
4 BERNSTEIN. I'M A PEDIATRIC CARDIOLOGIST AT UCSF  
5 CHILDREN'S HOSPITAL AND A CELL BIOLOGIST. SO I  
6 WANTED TO MAKE THREE COMMENTS.

7 FIRST, I WANT TO ECHO WHAT DR. GREEN AND  
8 DR. KRIEGSTEIN SAID IN THAT I THINK AS A SCIENTIFIC  
9 COMMUNITY, WE'RE REALLY ETHICALLY OBLIGATED TO HELP  
10 EXPLAIN TO THE PATIENT ADVOCACY COMMUNITY WHY  
11 CLINICAL TRIALS WOULD BE PREMATURE IN CERTAIN  
12 INSTANCES AND WHEN CLINICAL TRIALS WOULD BE  
13 APPROPRIATE, ESPECIALLY FOR THOSE OF US WHO TAKE  
14 CARE OF PATIENTS AND REALIZE THAT IT WOULD BE GREAT  
15 TO HAVE A THERAPY THAT WOULD SAVE THIS PATIENT'S  
16 LIFE AND THAT WITHOUT THAT, A PATIENT THAT WE TAKE  
17 CARE OF AND CARE ABOUT MAY NOT SURVIVE. BUT DESPITE  
18 THAT, WE NEED TO BE RESPONSIBLE. AND WE NEED TO BE  
19 RESPONSIBLE TO THE PEOPLE OF CALIFORNIA.

20 SECONDLY, I WANT TO ECHO WHAT BRUCE  
21 CONKLIN SAID ABOUT THE MERITS OF WORKING WITH  
22 PLURIPOTENT STEM CELLS AS OPPOSED TO TISSUE-SPECIFIC  
23 OR ADULT STEM CELLS. AND I HAD TO SMILE AT BRUCE'S  
24 COMMENT BECAUSE THROUGH CIRM-FUNDED RESEARCH,  
25 ALTHOUGH MY LAB SPECIFICALLY IS TRYING TO LOOK AT

## BARRISTERS' REPORTING SERVICE

1     WAYS TO MAKE STEM CELLS THAT WILL IMPROVE HEART  
2     DISEASE, WE STUMBLED ONTO A SUBSET OF STEM CELLS  
3     THAT TURNS OUT TO MAKE NEURAL PRECURSOR CELLS.  AND  
4     WITHOUT HAVING DONE -- APPROACHED THIS FROM THE  
5     PERSPECTIVE OF LOOKING AT PLURIPOTENT STEM CELLS, WE  
6     NEVER WOULD HAVE MADE THAT DISCOVERY, WHICH  
7     HOPEFULLY OTHER GROUPS WILL BE ABLE TO CAPITALIZE  
8     ON.

9             AND FINALLY, I WANT TO MAKE A SECOND  
10    COMMENT ON THE ISSUE OF THE FOCUS ON USING  
11    PLURIPOTENT EITHER EMBRYONIC OR INDUCED PLURIPOTENT  
12    STEM CELLS, THAT IT'S REALLY HEARTENING TO SEE THAT  
13    THERE'S BEEN A CHANGE AT THE FEDERAL LEVEL, BUT NIH  
14    NOW HAS A LOT OF WORK TO DO TO DETERMINE HOW THEY'RE  
15    GOING TO GO ABOUT FUNDING EMBRYONIC STEM CELL WORK.  
16    AND IT IS GOING TO TAKE SOME TIME.  IN ADDITION, AS  
17    DR. GREEN POINTED OUT, THERE REALLY HASN'T BEEN ANY  
18    INCREASE IN THE BASE OF THE NIH BUDGET.  AND GIVEN  
19    THE ECONOMY, IT'S UNLIKELY THAT'S GOING TO HAPPEN IN  
20    THE NEAR FUTURE.  SO I DON'T THINK WE CAN RELY ON  
21    NIH.

22            IN ADDITION, CIRM HAS ALREADY MADE A  
23    CONSIDERABLE INVESTMENT IN FUNDING A TYPE OF  
24    RESEARCH THAT REALLY IS NOT GOING ON IN MANY PLACES  
25    AROUND THIS COUNTRY.  AND WE'RE NOW POSED REALLY TO

## BARRISTERS' REPORTING SERVICE

1 TAKE ADVANTAGE OF THIS INVESTMENT, TO REALLY GET THE  
2 REWARD FROM IT.

3 AND I THINK WHILE I AGREE WITH THE  
4 COMMENTS THAT WERE MADE, THAT ANYTHING THAT LOOKS TO  
5 BE A PROMISING THERAPY SHOULD BE EXPLORED FULL BORE  
6 BECAUSE WHAT WE REALLY WANT IS TO HELP OUR PATIENTS,  
7 THAT WE HAVE MADE THIS INVESTMENT. WE'RE REALLY  
8 ABOUT TO SEE A RETURN ON IT, AND WE SHOULDN'T LOSE  
9 SIGHT OF THAT.

10 DR. CSETE: WE'RE ALL TALKING THE SAME  
11 LANGUAGE. FOLLOWING UP ON THIS \$600 MILLION  
12 INVESTMENT, AND REALLY ALMOST THE VAST MAJORITY  
13 PLURIPOTENT STEM CELL WORK, IS EXACTLY WHAT'S  
14 STARTING TO HAPPEN NOW. THE BEST OF THESE ARE  
15 THINGS THAT WE HOPE THESE MECHANISMS WILL ALLOW  
16 PEOPLE TO CONTINUE WITH. SO WE TIMED THE APPEARANCE  
17 OF BASIC BIOLOGY PERFECTLY TO CAPTURE ON THIS FIRST  
18 ROUND THE SEED GRANTS THAT WERE DOING WELL AND  
19 FINISHING UP ON TIME AND IN THE NEXT ROUND FOR THE  
20 SEED GRANTS THAT WERE DELAYED BECAUSE OF  
21 ADMINISTRATIVE AND OTHER ISSUES.

22 SO THE WHOLE IDEA IS TO MAKE SURE THAT OUR  
23 INVESTMENT GETS CARRIED FORWARD TO THE NEXT LEVEL.  
24 ABSOLUTELY.

25 DR. LOMAX: THANK YOU. GEOFF LOMAX FROM

## BARRISTERS' REPORTING SERVICE

1 CIRM. I JUST WANTED TO CONVEY A COMMENT RECEIVED  
2 VIA E-MAIL FROM THE NATIONAL ASSOCIATION OF  
3 HEPATITIS TASK FORCES. SO IF I JUST MAY READ  
4 THROUGH THIS, THAT WAS THE REQUEST. AND THE COMMENT  
5 IS FROM -- THE REQUEST IS FROM BILL REMAK.

6 "OUR BOARD OF DIRECTORS AND MEDICAL  
7 ADVISORS WISHES TO CONVEY THEIR SUPPORT FOR A  
8 MOVEMENT AND DIRECTION THAT WILL PROCEED WITH A  
9 FAIR-MINDED APPROACH TO ADVANCED RESEARCH IN THE  
10 AREA OF LIVER DISEASE. HOWEVER, WE DO ACKNOWLEDGE  
11 THAT FOR THE PURPOSE OF EXPEDIENCY AND SAVING LIVES,  
12 THAT A FOCUS MAY LEAN IN THE DIRECTION OF WHERE THE  
13 RESULTS MAY BE MORE OPPORTUNISTIC.

14 "WE WISH TO CONVEY THAT IN CALIFORNIA  
15 ALONE THE CDC ESTIMATES THAT OVER A MILLION CITIZENS  
16 OF OUR STATE MAY BE CURRENTLY EXPOSED TO CHRONIC  
17 LIVER-RELATED CONDITIONS, AND THE COST TO SOCIETY  
18 AND OUR ECONOMY ARE STAGGERING. WE URGE YOU TO  
19 CONSIDER CAREFULLY THE NEEDS OF ADDRESSING THIS  
20 COMMUNITY AND ITS RELATION TO OTHER COMORBIDITIES  
21 FOR THE BENEFIT OF THE PROGRAMS THAT DEMONSTRATE  
22 REAL PROMISES IN THE FUTURE.

23 "WE ALSO WISH TO EXPRESS OUR INTEREST IN  
24 BEING INVOLVED AS A PARTNER IN THE EDUCATION AND  
25 PUBLIC AWARENESS OF THE PROGRESS THAT IS BEING MADE

## BARRISTERS' REPORTING SERVICE

1 BY CIRM AS IT RELATES TO LIVER DISEASES THAT ARE  
2 PROMINENT IN OUR COMMUNITIES. PLEASE FEEL FREE TO  
3 CONTACT US, AND WE OFFER OUR PARTICIPATION AS NEEDED  
4 TO HELP EXPEDITE THE MISSION TO FIND CURES FOR THOSE  
5 WHO ARE SUFFERING THROUGH STEM CELL RESEARCH. THANK  
6 YOU, SINCERELY, BILL REMAK."

7 DR. CSETE: THAT'S REALLY NICE TO HEAR.  
8 FOR THOSE OF YOU WHO DON'T KNOW ME WELL, I SPENT THE  
9 LAST 20 PLUS YEARS ON A LIVER TRANSPLANT SERVICE, SO  
10 THIS IS VERY CLOSE AND DEAR TO MY HEART. AND 2  
11 PERCENT OF THE AMERICAN POPULATION IS HCV POSITIVE  
12 NOW.

13 THERE WAS NO OBVIOUS CONNECTION REALLY  
14 BETWEEN US AND CIRM, AND OUR PORTFOLIO HAS VERY  
15 LITTLE IN THE WAY OF LIVER DISEASE, BUT I CAN ASSURE  
16 OUR FRIENDS THAT THERE'S VERY INTERESTING DISEASE  
17 TEAMS BEING FORMED IN THIS AREA, AND THAT WE'RE  
18 SEEING SOME PROGRESS IN BUILDING LIVER  
19 DISEASE-RELATED RESEARCH IN STEM CELL BIOLOGY. SO  
20 THAT WAS VERY NICE TO HEAR. THANKS.

21 MR. SHEEHY: OTHER QUESTIONS, COMMENTS? I  
22 WOULD LIKE TO SAY I PERSONALLY TAKE A DEEP INTEREST  
23 IN HEP C SINCE I THINK, WHAT, PERHAPS 40 PERCENT OF  
24 THE HIV COMMUNITY IN SAN FRANCISCO IS HEP C  
25 CO-INFECTED. I LOSE MORE FRIENDS TO HEP C NOW THAN

## BARRISTERS' REPORTING SERVICE

1 I DO TO HIV. IT'S ACTUALLY MUCH HARDER TO TREAT.

2 MR. BROWN: I WAS JUST GOING TO PASS ALONG  
3 AN ANECDOTE. I RODE DOWN ON THE BUS FROM SANTA ROSA  
4 THIS MORNING. I HAD A LADY, BLACK LADY SAT DOWN  
5 NEXT TO ME ON THE BUS AND SAID, SOMEHOW SHE ASKED  
6 WHERE I WAS GOING AND I TOLD HER I WAS GOING TO A  
7 STEM CELL CONFERENCE THIS AFTERNOON OR A MEETING.  
8 AND SHE SAID, "OH, PLEASE TALK TO MY HUSBAND BECAUSE  
9 I'VE GOT A BAD LIVER AND I SURE NEED TO HAVE  
10 SOMETHING DONE ABOUT IT." THERE ARE PEOPLE OUT  
11 THERE THAT NEED YOUR HELP. PRESS ON. PRESS ON.

12 MR. SHEEHY: THANK YOU. I THINK DR.  
13 KRIEGSTEIN.

14 DR. KRIEGSTEIN: JUST A VERY BRIEF  
15 QUESTION. JUST ACTUALLY TWO QUESTION, ONE OF THEM  
16 HAVING TO DO WITH MY CONSTITUENTS WHO HAVE ASKED ME  
17 TO ASK THIS QUESTION, WHICH HAS TO DO WITH THE NEW  
18 FACULTY AWARDS AND WHETHER THAT WILL BE RECURRENT OR  
19 NOT.

20 AND THE SECOND QUESTION HAS TO DO WITH THE  
21 BOND ISSUING AND THE SCHEDULE, AND WHETHER THERE  
22 WILL BE AN INTERRUPTION OR EXACTLY WHAT THE  
23 PROSPECTS ARE FOR THE FUTURE.

24 DR. CSETE: WE WON'T ISSUE NEW FACULTY  
25 AWARDS THROUGH 2010 UNDER THE CURRENT CONSTRAINTS OF

## BARRISTERS' REPORTING SERVICE

1 ANTICIPATING A LOWER THAN WE WOULD HAVE HOPED FOR  
2 BOND FLOW TO THE AGENCY. SO I CAN'T TELL YOU WHEN  
3 THEY WOULD HAPPEN, BUT THEY WON'T HAPPEN THROUGH  
4 DECEMBER 2010.

5 DR. TROUNSON: I'M SORRY. IT'S CLEAR THAT  
6 THERE'S A CASH FLOW ISSUE REALLY BROUGHT ABOUT BY  
7 ISSUES IN THE STATE OF CALIFORNIA, A \$40 BILLION  
8 ISSUE. AND NOW THE BUDGET HAS BEEN AGREED AND BOND  
9 SALES ARE STARTING TO TAKE PLACE, IT'S A LONG PERIOD  
10 FOR RECOVERY IN TERMS OF GETTING THE BOND MONEY TO  
11 PAY FOR SOME OF THE REALLY CRITICAL THINGS IN OUR  
12 COMMUNITY, EDUCATION, HEALTH, A LOT OF REALLY  
13 IMPORTANT INFRASTRUCTURE WHICH IS BADLY SUFFERING.  
14 MY SON'S TEACHER IS BEING BEEN PAID BY IOU'S, AND IT  
15 DOESN'T GO VERY FAR. AND SO WHAT WE DON'T WANT TO  
16 DO IS STEP IN FRONT OF THOSE COMMUNITY NEEDS.

17 SO THE WAY WE'VE CONSIDERED IT, AND IT'S  
18 REALLY A DECISION THAT WAS MADE BY THE ICOC, IS THAT  
19 WE OUGHT TO CONSTRUCT OUR BUDGETS FOR THE ABILITY TO  
20 PICK UP THE NORMAL STATE BONDS AT THE END OF 2010.  
21 WE WOULD HAVE SOME CONFIDENCE THAT THERE WOULD BE  
22 SUFFICIENT RECOVERY THAT BOND SALES WILL CONTINUE  
23 BECAUSE WE ARE, IN FACT, ALREADY ALLOCATED THE \$3  
24 BILLION. IT'S JUST A MATTER OF WHEN WE STEP UP.

25 SO IN THE INTERIM, BECAUSE WE ONLY HAVE A

## BARRISTERS' REPORTING SERVICE

1 HUNDRED SIXTY, LESS THAN THAT, A \$130 MILLION IN THE  
2 BANK AND OUR ACCOUNT COSTS, IF WE DIDN'T GET ANY  
3 MONEY AT ALL, WE WOULD REALLY ESSENTIALLY BE UNABLE  
4 TO MEET ANY PAYMENTS AFTER, SAY, SEPTEMBER THIS  
5 YEAR. SO THE TREASURER HAS AGREED TO ENABLE US TO  
6 RAISE MONEY THROUGH PRIVATE PLACEMENT OF BONDS; THAT  
7 IS, IN SPECIAL INSTITUTIONS AND INDIVIDUALS OF HIGH  
8 NET WORTH.

9 AND SO WHAT WE'VE DONE IS CONSTRUCT A  
10 BUDGET THAT WOULD, FOR EXAMPLE, ACCOMMODATE AROUND  
11 \$200 MILLION OF PRIVATE BOND ISSUANCE. IF WE WERE  
12 GOING TO CONTINUE AT THE RATE WHICH HAS BEEN A  
13 REALLY FAST RATE, WE WOULD PROBABLY NEED AROUND 350  
14 MILLION. SO WE'VE SORT OF SAID WE FEEL CONFIDENT  
15 THAT WE'D BE ABLE TO RAISE AROUND 200 MILLION.  
16 THEREFORE, WE'LL HAVE TO MAKE SOME ADJUSTMENTS IN  
17 OUR PROGRAM.

18 SO THERE WILL BE SOME ADJUSTMENTS, AND  
19 THOSE WILL HAVE TO BE MADE, THE DECISIONS MADE BY  
20 THE ICOC. AND WE WILL BE DISCUSSING THAT WITH THEM  
21 TOMORROW. SO TOMORROW WOULD BE A BETTER DAY TO BE  
22 VERY SPECIFIC ABOUT THE WAY WE DO IT. IT'S LIKELY  
23 WE MIGHT HAVE TO SLOW DOWN SOME OF THE PROGRAM OR  
24 REDUCE, JUST FUND ONLY THE REALLY TOP PART OF THE  
25 PROGRAM IN ORDER JUST TO BECOME CASH POSITIVE. I

## BARRISTERS' REPORTING SERVICE

1 HAVE NO WAY OF WRITING CHECKS. THE CHECKS ARE  
2 WRITTEN REALLY BY THE COMPTROLLER. SO THERE'S NO  
3 MONEY, NO CHECKS. SO THAT'S THE SITUATION.

4 I THINK IT WILL BE A MINOR ADJUSTMENT, TO  
5 BE HONEST, AND SOME MINOR ADJUSTMENT WILL BE  
6 NECESSARY. THERE HAS BEEN A LOT OF PAIN AND THERE  
7 IS A LOT OF PAIN OUT THERE IN THE COMMUNITY. IT'S  
8 BEEN AWFUL. AND I THINK WE'LL PROBABLY HAVE TO TAKE  
9 A LITTLE BIT OF PAIN OURSELVES JUST TO GET THROUGH  
10 THIS PARTICULAR SECTOR OF THE ECONOMY. BUT I FEEL  
11 VERY CONFIDENT BY THE END OF 2010 WE'LL BE BACK ON  
12 TRACK AND BACK ON OUR EXPECTED PLAN. SO A MINOR BIT  
13 IRRITATING, MAYBE, REDUCTION TO ACCOMMODATE A DIP,  
14 IF YOU LIKE.

15 MR. SHEEHY: IF I CAN ADD, AS A BOARD  
16 MEMBER, A LOT OF THE DOOM AND GLOOM WAS HAPPENING  
17 BEFORE THE BUDGET GOT SIGNED AND BEFORE THE STIMULUS  
18 PACKAGE WAS APPROVED. BOTH OF THOSE CIRCUMSTANCES  
19 HAVE RADICALLY CHANGED THE ENVIRONMENT IN WHICH WE  
20 ARE FUNCTIONING. THE PROBLEM IS NOBODY HAS BEEN  
21 ABLE TO FIGURE OUT WHAT THAT MEANS. SO CLEARLY A  
22 SUBSTANTIAL CHUNK OF MONEY IS COMING INTO THE STATE  
23 FROM THE STIMULUS PACKAGE. AND THE FACT THAT THE  
24 BUDGET HAS BEEN SIGNED IS GOING TO ALLOW THE STATE  
25 TO START ISSUING BONDS.

## BARRISTERS' REPORTING SERVICE

1                   AND I WOULD NOTE THAT WE HAVE BEEN  
2           APPROVED BY THE TREASURER TO ISSUE \$200 MILLION THIS  
3           YEAR AND \$200 MILLION NEXT YEAR IN PRIVATE PLACEMENT  
4           BONDS. WE DON'T KNOW WHAT THE MARKET IS GOING TO BE  
5           FOR THAT. ONE OF THE GREAT -- I DON'T WANT TO SAY  
6           IT'S A POSITIVE THING, BUT ONE OF THE FEATURES OF  
7           THIS DOWNTURN IS THAT INTEREST RATES ARE REALLY LOW.  
8           AND EVEN ISSUING PRIVATE PLACEMENT BONDS WHICH WOULD  
9           CARRY A PREMIUM OVER A USUAL G.O. BOND STILL PUTS US  
10          IN THE RANGE OF WHAT WE WERE TALKING ABOUT WHEN PROP  
11          71 WAS PASSED BECAUSE THE FED IS BASICALLY GIVING  
12          AWAY MONEY NOWADAYS.

13                   SO THE INTEREST RATES WE'RE TALKING ABOUT  
14          ARE NOT GOING TO BE ONEROUS AND FURTHER BURDEN THE  
15          PROGRAM BEYOND WHAT WE HAD ANTICIPATED WHEN PROP 71  
16          WAS PASSED.

17                   SO I THINK -- I GET TO VOTE ON THIS  
18          TOMORROW, SO PERSONALLY I THINK WE'VE SEEN FAR  
19          GREATER CHALLENGES AS AN AGENCY AND AS A BOARD. AND  
20          I THINK THE KEY CORE ASPECTS OF OUR PROGRAM WE'RE  
21          GOING TO KEEP MOVING FORWARD. I DON'T, FOR  
22          INSTANCE, HAVING SAT THROUGH THAT TRANSLATION ROUND,  
23          I BELIEVE WE'RE GOING TO FUND THE VERY BEST OF THAT.  
24          I TRULY DO BELIEVE THAT THE BOARD WILL MAKE THAT  
25          COMMITMENT. THE SAME THING, ASSUMING WE GET GREAT

## BARRISTERS' REPORTING SERVICE

1 DISEASE TEAM GRANTS, THEY MAY NOT BE ALL THAT  
2 FABULOUS, AND WE MAY DECIDE NOT TO FUND A LOT. BUT  
3 I THINK FOR THINGS THAT ARE ABSOLUTELY ESSENTIAL TO  
4 KEEPING OUR PROGRAM GOING FORWARD WE WILL FIND THE  
5 MONEY. I THINK THERE'S COMMITMENT AT THE STATE  
6 LEVEL. CLEARLY THE GOVERNOR HAS BEEN WITH US AND  
7 HAS BEEN A REAL SUPERSTAR AND SUPER HERO FOR US, AND  
8 THE TREASURER AND THE CONTROLLER AND ALL THE  
9 CONSTITUTIONAL OFFICERS, THERE'S NO WAVERING IN  
10 THEIR SUPPORT, NOR AT THE LEGISLATURE.

11 SO IT'S JUST GETTING THROUGH THIS, AND I  
12 KNOW FOR US IT'S IMPORTANT THAT WE COMMUNICATE, AS  
13 ALAN NOTED, THAT WE COMMUNICATE THAT WE'RE IN THIS  
14 WITH EVERYBODY ELSE THAT'S WORKING FOR THE STATE OF  
15 CALIFORNIA. I KNOW FOR LOTS OF US HERE AT UC, WE'RE  
16 SEEING THIS ON THE OTHER SIDE AND WE'RE HAVING --  
17 I'VE SEEN PEOPLE LEAVE THEIR JOBS IN MY UNIT. AND  
18 THIS IS PAINFUL FOR US. BUT I THINK THAT WE'RE  
19 GOING TO COME OUT OF THIS, AND I DON'T THINK WE'RE  
20 GOING TO SEE SEVERE ATTENUATION OF PROGRAM. I THINK  
21 WE'RE GOING TO SEE SOME TRIMMING AROUND THE EDGES.  
22 WE'RE NOT GOING TO BE ABLE TO GO DOWN AS FAR. WE  
23 TYPICALLY HAVE THREE CATEGORIES, AND THE TOP ONE IS  
24 THE FUNDABLE CATEGORY. I THINK THOSE ARE PROBABLY  
25 GOING TO BE FOR THE MOST PART OKAY. I THINK THAT

## BARRISTERS' REPORTING SERVICE

1 SECOND CATEGORY, FUND IF FUNDS ARE AVAILABLE, IT'S  
2 GOING TO BE TOUGH, BUT LUCKILY THE WAY DR. CSETE HAS  
3 THIS ARRANGED, WE CAN COME BACK NEXT YEAR, AND NEXT  
4 YEAR WE SHOULD BE FINE ACTUALLY.

5 AS HAS BEEN NOTED, WERE FULLY AUTHORIZED  
6 FOR THE WHOLE 3 BILLION. IN TERMS OF THE PRIVATE  
7 PLACEMENT, IT IS IMPORTANT TO NOTE THAT INVESTORS  
8 LOOK AT CALIFORNIA BONDS AS BEING VERY SAFE BECAUSE  
9 THE STATE HAS TO PAY THEM SECOND AFTER PAYING FOR  
10 SCHOOL, SO CALIFORNIA HAS TO PAY ITS DEBT. SO IT'S  
11 NOT VERY RISKY DEBT. IT'S NOT LIKE SOME OF THE  
12 THINGS THAT ARE BEING TOSSED AROUND LIKE THESE CDO'S  
13 OR OTHER THINGS THAT HAVE GONE DOWN THE PIKE.

14 SO I DON'T WANT THE SCIENTIFIC COMMUNITY  
15 TO THINK THAT WE'RE NOT GOING TO BE IN BUSINESS  
16 BECAUSE WE ARE. AND COME HELL OR HIGH WATER, WE'VE  
17 BEEN THROUGH A LOT WORSE, LET ME TELL YOU. SO WE'LL  
18 BE THERE AND WE'LL BE HERE.

19 ANY OTHER -- I DON'T MIND FINISHING UP  
20 EARLY, BUT PEOPLE HAVE ANY KIND -- ANY ADDITIONAL  
21 INPUT?

22 MR. LUBIN: I THINK THIS HAS BEEN A  
23 WONDERFUL DISCUSSION. I JUST WANTED TO COMMENT ON  
24 HOW THE REVIEWERS ARE INSTRUCTED TO REVIEW  
25 APPLICATIONS GIVEN WHAT NIH -- IF YOU LOOK AT HEART,

## BARRISTERS' REPORTING SERVICE

1 LUNG, AND BLOOD STIMULUS AWARDS, ABOUT 75 PERCENT OF  
2 THEM ARE IPS RELATED. IPS IS IN THEM. SO HOW ARE  
3 THE REVIEWERS GOING TO BE IDENTIFYING SOMETHING  
4 THAT'S UNIQUE FOR CALIFORNIA? SEEMS LIKE A  
5 CHALLENGE. I KNOW YOU'VE BEEN STRUGGLING WITH THIS,  
6 AND I THINK THAT'S IMPORTANT FOR US WHO ARE  
7 SUBMITTING APPLICATIONS.

8 DR. CSETE: SO I LOVE YOU SCIENTISTS. WE  
9 MAKE OUR REVIEW CRITERIA CLEAR IN THE RFA. AND THE  
10 CRITERIA THAT ARE IN THE RFA ARE NO DIFFERENT THAN  
11 THE CRITERIA THAT ARE GIVEN TO THE REVIEWERS. SO  
12 NOT A SECRET AT ALL. AND AS I SAID, ONE OF THEM HAS  
13 ALWAYS BEEN THE UNIQUE ABILITY OF CIRM TO FUND THIS  
14 PARTICULAR PROJECT COMPARED TO THE AVAILABILITY OF  
15 FUNDS IN OTHER AGENCIES. SO IT'S ONE OF MANY  
16 CRITERIA, BUT THEY'RE ALL THERE FOR YOU.

17 DR. TROUNSON: JUST ONE THING. YOU KNOW,  
18 I TAKE IT THAT THE POINT YOU'RE MAKING IS THAT IT  
19 WOULD BE A GOOD IDEA THAT WE ACTUALLY KNEW WHAT EACH  
20 OTHER WERE DOING IN TERMS OF THOSE AGENCIES. AND SO  
21 I HOPE THAT'S THE KIND OF ARRANGEMENT WE'LL COME TO,  
22 THAT WE WILL HAVE AN UNDERSTANDING OF WHAT THE  
23 PRIORITIES OF THE NIH ARE AND THAT WE CAN DO THESE  
24 THINGS IN A MUCH MORE INTEGRATED WAY OR PARTNERSHIP  
25 MANNER. I THINK THERE'S SO MANY NEW IDEAS COMING AT

## BARRISTERS' REPORTING SERVICE

1 THE MOMENT, TO BE HONEST, THAT THE WORLD IS AWASH  
2 WITH SOME REALLY INNOVATIVE SCIENCE. AND CLEARLY I  
3 KNOW THAT YOU'RE INVOLVED WITH SOME VERY INTERESTING  
4 NEW WORK. SO I WOULDN'T BE AFRAID OF INNOVATION  
5 THAT MIGHT BE THE NEXT PLATFORM.

6 IPS CELLS ARE JUST MAGNIFICENT AND  
7 FANTASTIC AS EMBRYONIC STEM CELLS HAVE BEEN AND  
8 STILL ARE, BUT THERE ARE ALSO TREMENDOUS  
9 OPPORTUNITIES STILL THERE. I MEAN REALLY IN MY OWN  
10 FEELING AS A SCIENTIST, WE'RE STILL SCRATCHING THE  
11 SURFACE OF THE OPPORTUNITIES. SO WE'LL BE LOOKING  
12 FOR THOSE DIAMONDS AMONGST ALL OF THOSE IDEAS THAT  
13 COME FORWARD BECAUSE THERE MAY BE SOMETHING HERE  
14 THAT CHANGES THE PARADIGM YET AGAIN.

15 AND THERE MAY BE, FOR EXAMPLE, VERY  
16 AVAILABLE TISSUE THAT CAN BE USED IMMEDIATELY FOR AN  
17 APPROPRIATE APPLICATION THAT WE HADN'T THOUGHT OF.  
18 SO ALL OF THESE THINGS REMAIN POSSIBLE. WE WANT TO  
19 ENCOURAGE THAT. WE WILL LOOK TO WHERE WE CAN BUILD  
20 ON WHAT WE'VE BEEN DOING, BUT WE'LL LOOK FOR THE  
21 GENUINE OPPORTUNITIES, AND THEN WE'LL BE ABLE TO  
22 SAY, I THINK, TO EVERYBODY, HOPEFULLY WITHIN THE  
23 NEXT 12 MONTHS, THAT WE HAVE SOME AGREEMENTS WITH  
24 NIH TO JOINTLY EXPLORE SOME OF THESE AREAS TOGETHER  
25 SO WE EACH KNOW WHAT OUR PARTICULAR PERSPECTIVE IS.

## BARRISTERS' REPORTING SERVICE

1                   AND JOINT ARRANGEMENTS PARTICULARLY, AS  
2   YOU KNOW, WITH OTHER GROUPS CAN BE VERY, VERY  
3   PROFITABLE IN TERMS OF OUTCOME. SO WE'RE HOPEFUL  
4   THAT THAT WILL ALL CONTINUE, AND THAT'S NOT IN ANY  
5   WAY TO SAY THAT THE SCIENTIST WORKING IN HIS OWN LAB  
6   IN SOME ROUNDABOUT PLACE WHO COMES THROUGH WITH A  
7   BRILLIANT IDEA, THEY'RE TO BE CHERISHED, CHERISHED  
8   BY INSTITUTIONS, BUT ALSO BY PEOPLE LIKE US. AND  
9   THE QUALITY, THE QUALITY OF SOME OF THOSE IDEAS, IF  
10  THEY CAN BE DRAWN OUT, WILL MAKE A DIFFERENCE.

11                  SO I HOPE YOU UNDERSTAND THAT WE'RE GOING  
12  TO DO OUR BEST TO UNDERSTAND WHAT EACH IS DOING, BUT  
13  TO BE AWARE OF THE CREATIVE ASPECT OF RESEARCH AND  
14  YET THE OPPORTUNITY TO GO TO THE CLINIC. I DON'T  
15  THINK WE CAN PUT THAT ASIDE IN ANY SENSE, AND I  
16  DON'T FEEL THAT ANYONE SAID THAT. I THINK WHAT  
17  WE'RE TALKING ABOUT IS WITH A GREAT DEAL OF CARE OR  
18  AS MUCH CARE AS POSSIBLE. BUT THERE ARE PATIENTS  
19  OUT THERE WHO DESPERATELY NEED SOME ALTERNATIVE.  
20  AND IF WE CAN GET THEM A TREATMENT, WHICH IS NOT  
21  NECESSARILY A CURE, BUT IMPROVES THEIR QUALITY OF  
22  LIFE, I THINK IT WOULD BE A REWARDING EXPERIENCE TO  
23  GET THERE.

24                  DR. CSETE: I KNOW THAT THERE'S ALSO A LOT  
25  OF ANGST IN THE COMMUNITY ABOUT THIS FIRST ROUND OF

## BARRISTERS' REPORTING SERVICE

1 DISEASE TEAMS. AND NOTHING HAS CHANGED AT NIH YET.  
2 AND THEY'RE NOT AN AGENCY KNOWN FOR NIMBLENESS  
3 NECESSARILY, SO IT'S GOING TO TAKE A FAIR AMOUNT OF  
4 TIME FOR THEM TO GET PROGRAMS IN PLACE THAT I THINK  
5 ARE REALLY ANYWHERE CLOSE TO THE KINDS OF PROGRAMS  
6 WE'VE HAD.

7 I GO TO STUDY SECTION VERY FRUSTRATED AT  
8 THE KIND OF PROGRAMS THAT HAVE BEEN PUT FORTH IN  
9 STEM CELL BIOLOGY THERE BECAUSE THEY'VE BEEN REALLY  
10 SO CAREFUL ABOUT A POLITICAL LINE, AND WE HAVEN'T  
11 HAD TO DO THAT, SO I THINK WE ARE STILL IN A UNIQUE  
12 POSITION.

13 MR. SHEEHY: ANY OTHER QUESTIONS OR  
14 COMMENTS? I WANT TO THANK EVERYONE FOR COMING TODAY  
15 AND FOR YOUR INPUT. AND I ALSO WANT TO THANK THE  
16 GLADSTONE, WHICH I SHOULD HAVE DONE AT THE  
17 BEGINNING. I FEEL LIKE I'M HOME WHEN I'M HERE.  
18 THEY'RE SUCH A FABULOUS PLACE AND INCREDIBLE  
19 SCIENCE. SUCH A BEAUTIFUL SPACE TOO, SO I ALWAYS  
20 LOVE COMING HERE.

21 SO THANK YOU VERY MUCH. AND I THINK,  
22 WHAT, WE'RE GOING TO BE BRINGING THIS AROUND  
23 PROBABLY FOR APRIL AT THE ICOC, THE ACTUAL PLAN.

24 (THE MEETING WAS THEN ADJOURNED AT  
25 02:43 P.M.)

**BARRISTERS' REPORTING SERVICE**

**REPORTER'S CERTIFICATE**

I, BETH C. DRAIN, A CERTIFIED SHORTHAND REPORTER IN AND FOR THE STATE OF CALIFORNIA, HEREBY CERTIFY THAT THE FOREGOING TRANSCRIPT OF THE PROCEEDINGS BEFORE THE CALIFORNIA INSTITUTE FOR REGENERATIVE MEDICINE IN THE MATTER OF A PUBLIC COMMENT SESSION REGARDING CIRM'S STRATEGIC PLAN WAS HELD AT THE LOCATION INDICATED BELOW

THE GLADSTONE INSTITUTE  
1650 OWENS STREET  
SAN FRANCISCO, CALIFORNIA  
ON  
WEDNESDAY, MARCH 11, 2009

WAS HELD AS HEREIN APPEARS AND THAT THIS IS THE ORIGINAL TRANSCRIPT THEREOF AND THAT THE STATEMENTS THAT APPEAR IN THIS TRANSCRIPT WERE REPORTED STENOGRAPHICALLY BY ME AND TRANSCRIBED BY ME. I ALSO CERTIFY THAT THIS TRANSCRIPT IS A TRUE AND ACCURATE RECORD OF THE PROCEEDING.
